AUTHOR	Grachek, Barbara A.; Sikkink, Donald E.
TITLE	A Project on Course Self-Selection and Self-Determination of Rate of Progress. Final Report.
SPONS AGENCY	Fund for the Improvement of Postsecondary Education (DHEW), Washington, D.C.
PUB DATE	77
NOTE	537p.
EDRS PRICE	MF-$1.00 HC-$28.79 Plus Postage.
DESCRIPTORS	Academic Achievement; Bachelors Degrees; College Students; *Degree Requirements; Degrees (Titles); *Elective Courses; *Experimental Programs; Experiments; Individual Power; *Liberal Arts; State Colleges; State Universities

ABSTRACT

It was the purpose of the study to allow a limited number of students (200) at St. Cloud State College (now a university) in Minnesota an opportunity to design their own programs of study without regard to college curriculum regulations. The pilot program was limited to students working for a bachelor of arts degree (liberal arts). Two control groups were used for comparison. The results are examined and illustrated with extensive statistical data. (MSE)

ACKNOWLEDGMENTS

I am indebted to a number of people whose help has been crucial to the research conducted since 1971.

First, I need to express my thanks for the cooperation of the faculty and its governing body the Faculty Senate for approving this experimental program and its research.

Secondly, I thank the Advisory Committee who served without compensation or release time--Warren Armstrong, James Craik, Mary Craik, Paul Gilbert, Paul Ingwell, Jack Knutson, Reuel Pietz, and Keith Rauch--who all faithfully attended meetings and provided helpful suggestions throughout all stages of the experiment. I also appreciate their leadership in urging the adoption of the program as a permanent academic option.

A major expression of appreciation must go to the students in the experimental program whose academic performance, completion of survey forms, and appearances at open hearings enhanced the acceptance of the permanent program.

Finally, I need to thank the Minnesota Legislature for the initial grant which started this program and the Fund for the Improvement of Postsecondary Education, United States Department of Health, Education, and Welfare, whose three-year grant allowed the project to continue.

I also want to make special note of the remarkable contribution of my Assistant Director who by the end of the project was in fact Co-Director. Barbara Grachek combined the skills of hard work, research

insight, numerical ability, and secretarial skills like no one else on our campus. Without her the project would not be half way to the level demonstrated by this final report.

Donald E. Sikkink

INTRODUCTION

The Twentieth Century has often been referred to as the "expansion era" in the history of higher education. During this period a major aim of institutions of higher education has been increased accessibility and usefulness. Accomplishment of such an aim should further strengthen the American higher education system and provide a major impetus for its future.

This aim has been a particular concern for "state colleges" as they face the sizeable task in adapting to the role of multi-purpose institutions serving a diverse body of students. This task is particularly difficult in curriculum for some of the old "teacher's college" patterns have remained and new requirements have frequently only reflected attempts to imitate liberal arts colleges or universities. In addition, from a historical perspective these institutions have been marked by close board control, autocratic internal administration, inadequate financing, and prescribed curriculums thereby limiting curricular experimentation.

STATEMENT OF THE PROBLEM

The student dissatisfaction with higher education in the 1960's seemed to reflect a general dissatisfaction with our society. One issue in that student dissatisfaction was the question of the relevance of their education. The problem with relevance as an issue is that students do not agree among themselves as to what is relevant. Despite this, we should expect students to continue to question their education; and to expect that the major questions will be directed toward curriculum and toward instruction, with the major thrust of this criticism hinging on the issues of relevance of courses/requirements and quality of instruction.

The prospect of future curriculum protests in institutions of higher education that are not responsive to curriculum innovation is likely. The study which follows was designed with that problem in mind.

PURPOSE OF THE STUDY

It was the purpose of this study to allow a limited number of students (200) at St. Cloud State College (changed to "University" in 1975) an opportunity to develop and design their own programs of study without regard to college curriculum regulations. These students, therefore, would be awarded the Bachelor of Arts degree under an experimental plan upon the completion of the following requirement:

> The completion of any self-selected 192 quarter credits with an over-all grade point average of 2.00 (C). At the time of graduation, the students' transcripts will be marked to indicate that they have earned a B. A. degree under a pilot program in Self-Selection.
>
> No major or minor program would be required for graduation, but students completing 48 or more credits in one discipline would be granted a major in that field.

The pilot program was limited to students interested in a Bachelor of Arts degree (liberal arts); it was not intended for the student interested in a Bachelor of Science teaching degree or any program where certification or professional licensing standards were required for employment.

The following curriculum regulations of St. Cloud State University did not apply to these students:

(1) A student must have 68 credits in general education taken from a list of prescribed courses.

(2) A student must have a 60-hour concentration of courses (major-minor, major-foreign language, or interdepartmental major).

(3) A student must complete 60 per cent of the courses in his major in 300-400 level courses and 50 per cent of the courses in his minor in 300-400 level courses.

(4) A student must take certain required courses in a discipline in order to claim a major or minor in that field.

(5) A student who fails to maintain a C average for any given quarter is considered to be doing academic work that is unsatisfactory.

(6) A student must take prerequisites for a course before the course can be taken.

(7) A student's normal credit load is 16-18 hours and permission to carry more than this load shall be granted by the Vice President for Academic Affairs only in exceptional cases or to those students whose cumulative average is 3.00 or better. A student shall not be allowed to carry more than 20 quarter hours in one quarter.

(8) A student must have a 2.00 (C) average in the communication courses.

(9) A student usually takes courses on this basis: 100-level courses are generally for freshmen; 200 for freshmen and sophomores; 300 for juniors, and 400-level courses for juniors and seniors.

Exemptions from these requirements allowed the students in the pilot self-selection program complete freedom in course selection and rate of progress toward the degree.

This proposal was based on several assumptions. Key assumptions included:

(1) "Good" teachers are of greater importance to the ultimate education of a student than are specific courses, requirements, credits, and other such numerical schemes.

(2) Our environment is changing so rapidly that the capacity of any group (faculty, administration, board) to adequately establish specific graduation requirements suitable for a large diverse student body is doubtful.

(3) Self-motivation brought about when one makes a choice and then works to prove it was the right choice can produce more learning than external motivators.

(4) Many students are capable of a faster rate of progress in college than provided for by the present system.

Thus, it was assumed that students enrolled in the Self-Selection Program would individualize their own educational experiences and tailor their programs to their own individual needs. The students' abilities and interests would determine their own individual development and career preparation.

DEFINITION OF TERMS

The following terms are used throughout the remainder of this report and have these definitons attached to them:

"Freshman" Group -- A group of 111 new-entering freshmen in Fall Quarter, 1972, who enrolled in the experimental Self-Selection Program. These students had no previous college experience.

"Current" Group -- a group of 102 St. Cloud State University students who had sophomore or less standing as of Fall Quarter, 1972, who enrolled in the experimental Self-Selection Program. These students had earned anywhere from 12 to 96 quarter hour credits in the regular degree programs prior to entering Self-Selection.

"Matching" Group -- A group of 111 new-entering freshmen in Fall Quarter, 1972, who were selected as a control group for the experimental "Freshman" group based on five American College Testing (ACT) scores and high school rank (HSR).

"Random" Group -- A group of 111 new-entering freshmen in Fall Quarter, 1972, who were selected through the use of random numbers as a control group for the experimental "Freshman" group.

ACT -- Standardized test administered by the American College Testing Service measuring general knowledge. Yields scores in English, Mathematics, Social Science, Natural Science and a Composite score.

Crs. Earned -- Total credits earned by the student which are applicable toward graduation requirements.

Crs. HPV -- total credits with honor point value (includes grades of "E"; does not include grades of "S", "U", "W", or "I".

Hon. Pts. -- total number of honor points; computed by multiplying number of credits with honor point value by numerical value of letter grade (A = 4; B = 3; C = 2; D = 1; E = 0).

H. P. R. -- Honor Point Ratio; numerical ratio of the total credits with honor point value and the total honor points received. The three figures given followed by the H.P.R. are Crs. Earned, Crs. HPV, Hon. Pts., H.P.R.

Inc. "E" -- Incomplete grades must be removed by the student within one quarter. If it is not removed within the time limit, the "I" is changed to an "E" (failure).

Inc. Rem. -- Incomplete grade removed. Grade changed as a result of completing necessary requirements for the course.

METHODOLOGY

The pilot project was limited to 200 students--100 new-entering freshmen and 100 current students (sophomore or lower standing). All freshmen who applied and were accepted under the normal admission procedures to St. Cloud State College in the Fall Quarter, 1972, were sent information on the project; and the first 100 to make application to the project were to be admitted. The current students were informed of the project through the school newspaper, and the selection of 100 students was to be based on those students who had the most credits yet to complete for a degree. No one with more than a sophomore standing was admitted to the program. As a result of this procedure, 111 freshmen applied for the program; and all were accepted. Approximately 175 "current" students applied; and by using the sophomore level cut-off, 102 students were admitted to the pilot project.

Two control groups were selected for purposes of comparison with the "freshman" self-selection group. Because the "freshman" group was selected from the entire freshman class of 1972, a "random" group of new-entering freshmen was also selected through the use of a table of random numbers for comparison purposes. In addition, it was noted that the "freshman" self-selection group had high American College Testing (ACT) scores and high school ranks (HSR). Thus, a "matching" control group of new-entering freshmen was also selected on the basis of ACT and HSR scores. Because of the diverse nature of the "current" self selection group--variable number of credits completed to date, various dates for first admission to this institution, different age levels, etc.--it was not possible to select a representative control group in the same manner.

In determining the success or failure of the pilot program in self-selection, answers to the following questions were sought:

(1) What are the characteristics of the students who applied for the program?

(2) How many of the required general education courses did the project students complete?

(3) How many of the required courses in a major did the project students complete?

(4) What is the honor point record of the project students?

(5) What is the retention rate for project students?

(6) What is the rate of progress of project students?

(7) What is the level of course selection of project students?

(8) What is the level of degree completion of project students?

(9) What instructor preference selection takes place by project students?

(10) What is the attitude of the project students concerning the project and the institution?

(11) What kind of courses do the project students select?

(12) What is the rate of completion of courses selected?

(13) What is the employment potential of students who have completed the self-selection degree?

With these questions formulated, data was collected on the project students and the two control groups for four years--Fall Quarter, 1972, through Spring Quarter, 1976.

RESULTS

(1) What are the characteristics of the students who applied for the program?

A profile of the "freshman" self-selection students and the two control groups--"Random" and "Matching"--resulted in the following:

	"Freshmen"		"Matching"		"Random"	
Males	45		45		46	
Females	66		66		65	
ACT Scores	Males	Females	Males	Females	Males	Females
English	19.47	21.85	19.58	21.63	18.25	20.31
Math	23.27	20.80	23.27	20.75	23.98	20.31
SocS	23.47	23.14	23.16	23.06	21.00	20.58
NatSci	26.07	23.55	26.04	23.88	24.16	22.08
Composite	23.16	22.46	23.13	22.46	21.95	20.98
High School Rank	62.2	78.9	64.2	79.0	63.1	71.7

Major areas of interest were available for the "freshman" self-selection group only. These interest areas classified by schools included:

School of Business	-- 12%
School of Education	-- 7%
School of Fine Arts	-- 22%
School of Industry	-- 1%
School of LA + S	-- 33%
Undecided	-- 25%

The "current" group consisted of 102 students--47 males and 55 females. Within this group 40 per cent had completed less than 48 credits (freshman standing) and 60 per cent had completed at least 48 credits but less than 96 credits (sophomore standing). The honor point ratios earned by these students prior to admission to the pilot program were distributed as follows (4.00 = A):

3.00 or higher	-- 31%
2.00 - 2.99	-- 53%
0.00 - 1.99	-- 16%

Their major areas of interest included:

School of Business	-- 5%
School of Education	-- 7%
School of Fine Arts	-- 18%
School of Industry	-- 0%
School of LA + S	-- 39%
Undecided	-- 31%

While limited information on the backgrounds of students enrolled in the pilot program was available, it seemed in examining this information that these students were representative of the total institution population. No attempt was made at the time to assess psychological backgrounds; however, attitude tests were administered to assess views toward the institution and those results will be discussed later in this report.

(2) How many of the required general education courses did the project students complete?

When the self-selection program was initiated in the Fall, 1972, St. Cloud State College had a structured general education program consisting of sixty-six credits. The 1972-1973 St. Cloud State College Bulletin stated the following about General Education requirements:

> All students working toward either the Bachelor of Arts or Bachelor of Science degrees must meet all of the requirements of the General Education program as listed below. Students who have declared their major and minor(s) are excluded from general education courses offered by their major and minor departments.
>
> Group I - All courses required.
> Speech 161 (4)
> Eng 162 or 172; 263 or 264 (8)
> Philosophy 215 (4)
> Social Science 104 (4)
> Physical Education (4)
>   Women: 4 one-cr. activity courses
>   Men: P.E. 100 and 3 one cr. activity courses
> Current Issues 432 (2)
> One of the following:
>   Economics 401 (4)
>   Political Science 401 (4)
>   Social Science 401 (4)
>
> Group II - Three of the following:
> Geography 171 (4)
> History 101 (4)
> Industrial 192 (4)
> Psychology 121 (4)
>
> Group III - Four of the following:
> Biology 101 (4)
> Biology 104 (4)
> Chemistry 102 (4)
> Mathematics 121 (4)
> Physics 103 (4)
> Earth Science 206 (4)
> Physics 207 (4)
>
> Group IV - Two of the following:
> Art 121 (4)
> English 124 (4)
> Music 123 (4)
> Theatre 140 (4)
>   or
> 12 hours of a foreign language
>   or
> American Studies 101, 102 (8)

> Students with a strong background in an area have the option of substituting other courses for a required general education course. The guideline for such substitutions is that they must result in a better balance among the natural sciences, social sciences, and the humanities in the student's total program. Requests for substitutions must be made on forms available in the Office of Academic Affairs.

As outlined above, the sixty-six credits in general education were disdistributed into four groups--Group I consisted of 30 credits required of all students in communications, philosophy, social sciences, and physical education activity; Group II consisted of 12 credits in social sciences; Group III consisted of 16 credits in natural sciences; and Group IV consisted of 8 credits in humanities.

Although students enrolled in the experimental self-selection program were not required to complete the general education component, results indicated that all of them did select some general education. As shown in Table I, the self-selection "freshman" group attempted 553 courses in general education as compared to 1,015 for the "matching" group and 1,170 for the "random" group. Further, the "freshman" group attained an overall higher average than the two control groups--2.85 compared to a 2.64 for the "matching" group and 2.63 for the "random" group.

Further analysis showed that the self-selection "freshman" group attained a higher over-all grade point average in all four groups of the general education distribution--all required, social sciences, natural sciences, and humanities. In comparison to the "matching" group, the self-selection "freshmen" earned lesser grade point averages in only five classes (History 101, Industrial 192, Chemistry 102, Music 123, and American Studies 102). The "random" group earned higher grade point averages than the self-

SUMMARY OF ENROLLMENT AND HONOR POINT RATIO INFORMATION IN GENERAL EDUCATION COURSES FOR 1972 - 1976

selection "freshmen" in only six courses (Industrial 192, Psychology 121, Chemistry 102, Physics 207, Music 123, and Theatre 140).

When the ACT test scores of the three groups--"freshmen," "matching," and "random"--were compared on the basis of the general education courses attempted by each group (example: ACT English score with Group 1, English 162), no significant differences existed. With this comparison process, it was concluded that "freshman" self-selection students selecting particular general education courses did not have significantly higher or lower ACT test scores than the control groups. Thus, it was suggested that the higher grade point averages earned by the self-selection "freshmen" were due in part to the individual interests in the courses.

Additional breakdown of general education selection and achievement by the three groups is included in Appendix A.

(3) How many of the required courses in a major did the project students complete?

Under the experimental program, students were not required to declare majors and/or minors. They were allowed, however, to declare majors if they completed any 48 credits in a discipline. They were not allowed to declare minors. Of the sixty graduates during the period Fall, 1972, through Spring, 1976, only four chose not to declare majors. Nineteen students declared two majors, two students declared three majors, and the remaining thirty-five declared one major.

Because the traditional Bachelor of Arts and Bachelor of Science majors were not always explicitly outlined in the College Bulletin, a questionnaire and a copy of the courses which applied toward the student's major upon graduation were sent to the major department chairperson for reaction. Questions asked and responses included:

(1) How does the program selection of this student compare to the required B.A. program in your department?

23 As Good
37 Almost As Good
13 Much Weaker

(2) If this student had the necessary recommendations, grade point average, and Graduate Record Exam scores, do you think the selection of courses would be acceptable for admission to most graduate schools in your disciplines?

20 Definitely
37 Probably
16 Probably Not

(3) Do you feel this individual is qualified for general employment within the job areas of your discipline?

50 Yes
18 Maybe
5 No

(4) What strengths do you see in this student's program of self-selected courses within your discipline? (open-ended; summary of responses)

15 Over-all balance
9 Particular emphasis
1 Grades
10 Additional credits
4 Excellent
34 None

(5) What weaknesses do you see in this student's program of self-selected courses within your discipline? (open-ended; summary of responses)

14 Lacks breadth
15 Lacks particular emphasis
7 Avoided difficult courses
7 Lacks basic courses
3 Lacks career preparation
27 None

(6) Would the major as completed here have been approved under the regular B.A degree structure?

32 Yes
41 No

(7) If you answer No to Number 6, what course(s) would you add to this major to meet your specific departmental requirements for the B.A. degree? (open-ended; summary of responses)

3 Short credits
2 Lacks 300-400 level courses
8 Lacks one course
3 Lacks two courses
25 Lacks more than two courses

From this survey of department chairpersons it is observed that although slightly less than half (44 per cent) of the major programs completed would have met the B.A. requirements under the traditional format, eighty-two per cent of them were "as good" or "almost as good" as the required programs; seventy-eight per cent of the programs would "probably" or "definitely" be accepted by graduate schools; and ninety-three per cent would qualify for general employment within the discipline area. The only division that indicated a completely negative attitude toward the majors selected was the College of Business in which a total of four majors were declared (one in Accounting; one in Marketing; and two in Management). As the College of Business major programs involve over 100 credits, the completion of only 48 credits in a discipline was not considered adequate under any situation.

Based on this survey, it was concluded that the completion of specific courses for a major was not always a necessity for employment or graduate school admission. In order to compensate for weaknesses in the major program structure, however, departmental approval of the major/minor program was included in the permanent proposal (to be discussed later).

(4) What is the grade record of the project students?

"Freshman" self-selection students earned an over-all 2.93 grade point average during the four years of the pilot project, as compared to a 2.84 for the "matching" group and a 2.80 for the "random" group. Further information on this topic will be discussed in Question Seven and in Appendixes B, C, D, E, and F.

The "current" group earned an over-all 2.99 during this same time period, and an analysis of the achievement before and after self-selection will be completed in Question Eight dealing with graduates of the program.

(5) What is the drop-out record of the project students?

One of the contentions of this experimental program was that students who were allowed freedom to select their own courses would be more likely to remain in school, thus lowering the attrition rate. This assumption, however, was not true. It was found that self-selection students were just as apt to drop out of school as regular degree students.

The enrollment patterns during the four year period--Fall, 1972, through Spring, 1976--appeared as follows:

QUARTER	"FRESHMEN"	"MATCHING"	"RANDOM"
Fall, 1972	111	111	111
Winter, 1973	103	99	99
Spring, 1973	91	94	88
Fall, 1973	69	66	68
Winter, 1974	64	66	61
Spring, 1974	61	59	62
Fall, 1974	50	53	48
Winter, 1975	45	57	49
Spring, 1975	44	53	47
Fall, 1975	39	46	39
Winter, 1976	40	44	43
Spring, 1976	40	42	36

Follow-up studies on "freshmen" who dropped out of school resulted in the usual responses--transferred to another institution (15); lack of interest (5); medical (2); academic (1); employment (1); undecided (1); not accomplishing anything (1); returning to school at a later date (12); and no response (29). Similar information was not available from the control groups.

(6) What is the rate of progress of project students?

One of the academic policy regulations in effect at this institution at the time of the experimental program was a course load restriction. According to the regulation, a normal credit load was 16-18 credits per quarter; and permission to carry more than that load "shall be granted by the Vice President for Academic Affairs only in exceptional cases or to those students whose cumulative average is 3.00 or better." In no case was a student permitted to carry more than 20 quarter hours in one quarter. In order for students in the experimental program to determine their own rates of progress, this regulation was removed for them.

With few exceptions, however, most project students did not carry more than the 16-18 credit load. In fact, a small number of students in the program were older adults or persons working at this institution who carried part-time loads. The average credits per term carried by "freshman" self-selection students was 13.9 compared to 14.6 for the "matching" group and 14.2 for the "random" group. The "current" group had a 13.5 average credit load. Only one "freshman" self-selection student graduated in less than four years--graduating in three years; however, he had obtained some credit for military experiences. Thus, the contention that self-selection students would shorten their stay in school by carrying heavier loads was not true.

(7) What is the level of course selection of project students?

Enrollment and honor point ratio information was collected for project students and the control groups from Fall Quarter, 1972, through Spring Quarter, 1976. This information was categorized by school and course level (100 = freshman level; 200 = freshman and sophomore; 300 = junior; and 400 = junior and senior level). Summaries of achievement by the four groups are shown in the following tables: Table II - "current" students enrolled in the self-selection program; Table III = "freshman" students enrolled in the self-selection program; Table IV = "matching" group used as a control for the "freshman" group; and Table V = "random" group also a control group for comparison purposes with the "freshman" group. In addition, detailed results of each quarter's achievement are contained in Appendixes B ("current"); C ("freshman"); D ("matching"); and E ("random"). Summaries by individual years 1973, 1974, 1975, and 1976 for all groups are given in Appendix F.

Analysis of the total credits and honor point ratios earned by each group by the various levels for the four years 1972-1976 showed the following distribution:

Group	100	200	300	400	Total
SS "Current"	12% (2.84)	32% (2.93)	27% (2.90)	29% (3.23)	2.99
SS "Freshmen"	35% (2.85)	38% (2.85)	16% (3.04)	11% (3.40)	2.93
"Matching"	44% (2.75)	29% (2.79)	15% (2.97)	12% (3.22)	2.84
"Random"	49% (2.68)	26% (2.72)	11% (2.95)	14% (3.41)	2.80

Although the above distributions indicated that the "freshman" self-selection group attained higher grade point averages at every level, analysis by schools indicated that the "freshman" self-selection group achieved higher grade point averages in "all-college" courses and in the School of Liberal Arts and Sciences. Totals for all levels by schools showed the following:

SUMMARY OF ENROLLMENT AND HONOR POINT INFORMATION BY COURSE LEVELS FOR 1972 - 1976

Although the project students earned lower grade point averages in the Schools of Business, Education, Fine Arts, and Industry, it can be seen that the greatest emphasis on course work occurred in the School of Liberal Arts and Sciences for all groups and that the greatest variations in grade point averages also occurred in that school. The achievement by the project students in the liberal arts and sciences certainly accounts, therefore, for their over-all greater achievement in the total analysis.

Assuming that grade point average is a measure of learning then, the results infer that over-all project students have learned more when given the opportunity to develop and design their own programs of study.

(8) What is the level of degree completion of project students?

Sixty students graduated under the self-selection program during the four year period--44 "current" students and 16 "freshmen." Of the 44 "current" student graduates, only four did not improve their grade point average under the self-selection program--one went from a 3.87 to a 3.80; another from 3.76 to 3.64; a third from 3.46 to 3.15 and a fourth from 3.43 to a 3.32. The other forty graduates equalled or improved their average honor point ratio under self-selection. Based on their over-all averages, four graduated with a 2.00-2.49 average; seventeen with a 2.50-2.99; sixteen with a 3.00-3.49 (scholastic honors); and seven with a 3.50-4.00 (high scholastic honors). Although there was no control group with which to compare the "current" students, their distribution of grade point averages upon graduation closely aligned with other graduates.

Sixteen "freshman" self-selection students graduated within the four year period studied as compared to 16 "matching" students and 11 "random" students. The grade point averages upon graduation for these students were distributed in the following categories:

Grade Point	"Freshmen"	"Matching"	"Random"
2.00-2.49	2	1	1
2.50-2.99	2	2	2
3.00-3.49	8	8	4
3.50-4.00	4	5	4
Totals:	16	16	11

Rate of progress toward the degree was alike for both "freshmen" and "matching" students, and somewhat slower for "random" students as compared to "freshmen" and "matching" students. Achievement ranges, too, were similar for "freshmen" and "matching" students and somewhat less for "random" students.

(9) What course and instructor selection takes place by project students?

One hypothesis of the experimental program was that given the opportunity to select their own courses students would tend to select certain instructors. In collecting data on this aspect for the first year, however, it was not possible to detect any particular trends. Because certain instructors taught specific courses or large lecture courses, in many instances it could not be determined if the students were selecting the courses because of the instructor or because of interest in the course itself. The first year's data did not produce any observable trends; and thus information on this aspect of the study was dropped.

(10) What is the attitude of the project students concerning the project and education?

To determine if students in the experimental program had attitudinal differences toward the institution, a Campus Environment Study from the Central States Colleges and Universities Cooperative Research Program was administered in the Winter Quarters of 1972-1973, 73-74, and 75-76. Information from the 1975-76 sample, however, was not considered valid because of the small sample of project students remaining at that time.

Analysis of the data from the attitude survey indicated that self-selection "freshmen" were more favorable toward St. Cloud State than the other groups in 1972-73; and there was a slight tendency for males to be more favorable than females. In the follow-up study in the Winter, 1973-74, the self-selection "freshmen" still showed a more favorable attitude, although they had dropped some from the first year. A more complete analysis of this study can be reviewed in Appendix G.

In a second format used to evaluate the attitude of students in the self-selection program, a survey was sent out in the Spring Quarter, 1973, and again in Spring Quarter, 1974, to obtain student reaction to their programs of study. Although none of the data secured was statistically significant at the .01 or .05 level, self-selection students found a greater percentage of their classes worthwhile, were glad they had selected St.

Cloud State, were selecting courses in a variety of fields, had little negative attitude toward the program, and overwhelming recommended this type of program be available to other students. Again, a breakdown of the responses to questions in this survey can be reviewed in Appendix H.

(11) What kind of courses do the project students select?

Project students selected courses in a variety of fields, however, the greatest concentration was in the School of Liberal Arts and Sciences. Analysis of majors completed by graduates in the program included four in the School of Business--Accounting, Marketing-General Business, and Management-Finance (2); twelve in the School of Education--Psychology (9), and Recreation (3); ten in the School of Fine Arts--Art (6), Music (3), and Theatre; none in the School of Industry; and sixty in the School of Liberal Arts and Sciences--American Studies (2), Biology (2), Criminal Justice Studies (4), Economics, English (5), Environmental Studies, Earth Science, French, Geography (3), History (3), Mass Communications (3), Mathematics (3), Medical Technology, Physics (2), Political Science (4), Public Administration, Social Science (3), Sociology (6), Social Work (5), Speech (5), and Urban Affairs (4). Thus, 70% of the majors declared were within the School of Liberal Arts and Sciences as compared to 5% in the School of Business, 14% in Education, and 12% in Fine Arts.

With the exception of two students in Art, there was no specialization to the extent of taking most courses in one or two departments. Most students presented diverse programs even if within the School of Liberal Arts and Sciences.

(12) What is the rate of completion of courses selected?

The concerns in the study on rate of completion of courses involved withdrawals from courses and the removal of incomplete grades. It was hypothesized that self-selection students would be more apt to withdraw from classes than regular degree students because of the freedom of selection. The data somewhat confirms this assumption.

The self-selection "freshmen" had 299 withdrawals ("W's") recorded in the four-year period; the "matching" group had 248 and the "random" group had 239. The "current" self-selection group recorded 272 "W's" during this same period. Thus, it was evident that self-selection students were more apt to withdraw from classes then traditional students; and this withdrawal factor was attributed to the freedom of curriculum choice provided the self-selection students.

When the student at St. Cloud State does not complete all course requirements during the term, the student is given an "I" for incomplete. "Such incompletes must be removed by the student within one quarter. ... If it is not removed within the time limit the "I" (incomplete) is changed to "E" (failure)." (College Bulletin) In the analysis of this aspect of course completion, it was noted that the "freshman" group removed 89 incomplete grades and had 38 incompletes convert to "E." The "random" group had 79 removed and 32 changed to "E." Information for the "matching" group was not available for the year 1972-73; however, for the years 1973-76, they had 68 incompletes removed and 28 incompletes changed to "E." In the four year period, the "current" students had 107 incompletes removed and 88 changed to "E." The "freshman" self-selection group, therefore, earned slightly more Incomplete grades; but their rate of completion of these courses (71 per cent) was similar to the control groups (70 per cent). The "current" group showed a greater tendency to earn "incomplete" grades and was less apt to remove the "I" satisfactorily (55 per cent).

Thus, the self-selection program did have an effect on the rate of completion of courses. Self-selection students withdrew from more classes and earned more "incomplete" grades than traditional students in the control groups. It was assumed, therefore, that freedom of choice in course selection as opposed to prescribed programs was a factor in rate of completion of courses based on these measurements.

(13) What is the employment potential of students who have completed the self-selection degree?

At the time of graduation, questionnaires were sent to self-selection students asking them about their future plans--employment, graduate school, etc.--and whether they would enroll in the self-selection program if they had an opportunity to do it again. Of the sixty graduates surveyed, ten were employed; fifteen were seeking employment; fifteen had been admitted to graduate schools; three intended to do postgraduate work in teaching; and seventeen did not respond to the questionnaire.

Employment of these graduates was in a variety of fields: Department of Corrections, State of Minnesota; teaching the mentally retarded; counselor at the St. Cloud Children's Home; manager trainee for Plitt Theatres; marketing representative for Eastman Kodak; Executive Director of Cedar Riverside Arts Council; actuary for Sentry Life Insurance; federal and state civil services; and the Minneapolis Tribune. Major programs completed by the students employed in these positions included psychology, sociology, social work, art, English, management, urban affairs, mathematics, history, mass communications, speech, and no major.

Students applying for admission to graduate school on the whole did not have negative reactions to the self-selection degree program. Most graduate school admissions were more concerned with the type of courses that the students had completed; although one student in physics indicated that the prospective graduate school contacted this institution for further information on the program (he was accepted). Admissions included the University of Minnesota (Public Administration; Physics); University of Arkansas (Physics); Nova University College of Law; Midwestern School of Law; Wartburg Theological Seminary; George Washington School of Law; and St. Cloud State University (Mathematics; Recreation; Community Education; Biology; Art; Business).

When asked if they would again choose the self-selection option for their undergraduate degree, without exception all respondents said "yes." Comments from the students on "why" produced some interesting insights. Some of these included:

> "This program was especially good for me because I had always planned to go to law school and therefore could plan the education I wanted and needed with that goal in mind."
>
> "Self-Select kept me in school."
>
> "...freedom to design my own courses of study geared to my particular interests and still earn a major in my field of study."
>
> "There are very few schools that have actuarial science programs. I 'designed' my own by taking business and econ courses in addition to math."
>
> "Can only do well in subjects I am interested in. Allowed me to intensify my training in my major."
>
> "It's a fantastic program because of its freedom."

> "I felt general education classes were not challenging enough--this is why I wanted to be in self-select--to take more challenging higher-level electives."

> "The flexibility was great--since I firmly believe that no program under the regular limits could have given me a real preparation for what I want to do--self-select did."

> "an experience in creative academics!"

> "It's the way all college programs should be--open and unstructured. Amen!"

> "Fantastic help...self-select kept me in school and was fun."

> "As far as I could tell prospective employers were not concerned negatively or positively with the self-selection program nor my self-select degree. They were primarily interested in two things: that I did have a college degree, and what I could do for them, what are my skills."

From these comments, it was evident that this type of program was beneficial to the experimental students; and consideration should be given to this type of program as a permanent viable option for future students.

CONCLUSIONS AND RECOMMENDATIONS

It was the purpose of this study to allow a limited number of students to design and develop their own programs of study without regard to degree requirements and course load. It was hypothesized that this type of program would meet students' desire for relevance, remove the criticism of unreasonable requirements, result in higher retention through personal satisfaction, and increase the motivation to learn.

Academic and personal data compiled on the experimental self-selection students and the two control groups during the four-year period from 1972 - 1976 confirmed these hypotheses to some extent. Results indicated that self-selection students performed academically as well or better than regular degree students, had more positive attitudes toward the institution in general, and were over-whelmingly satisfied with their degree attainment upon graduation.

Based on the favorable data compiled, a permanent degree program entitled the Bachelor of Elective Studies was recommended for adoption in the Spring, 1974. The substance of this curriculum proposal is included in Appendix I; and an amendment to this proposal, the Associate of Elective Studies, constitutes Appendix J.

With the adoption of these degree options, St. Cloud State University has provided students opportunities to design and develop their own programs of study if they so choose. A socio/political analysis of the diffusion of this innovation into this institution has been developed in Appendix K.

APPENDIX G

CAMPUS ENVIRONMENT STUDY

REPORT ON THE CAMPUS ENVIRONMENT STUDY

The St. Cloud State College Campus Environment Study, involving three groups of St. Cloud State College students, was completed in March, 1973. Recognizing that students have definite feelings and attitudes about the college environment, this survey was designed to identify and record their reactions in tabular form.

In the Fall Quarter, 1972, an experimental curricula program was instituted at St. Cloud State College under the direction of Donald E. Sikkink. This program allows a limited number of students to earn a Bachelor of Arts degree upon completion of any self-selected 192 quarter credits. Known as the Self-Selection Program, students enrolled in it are allowed to choose their own courses and take as many or as few courses each quarter as they feel they can handle satisfactorily. No major or minor is required for the degree; however, any student completing any 48 quarter credits in a discipline may earn a major in that discipline. Rules and regulations outlined in the College Bulletin with reference to class load, honor point ratios, prerequisites for courses, and the like are not applicable to students in the Self-Selection Program. It seems obvious that students who volunteered and were accepted for this program will have different attitudes towards their education and to the campus than will students working towards degrees under the structured programs.

The Self-Selection students are categorized into two groups: (1) 104 entering freshmen who were above the average of other St. Cloud State

College entering freshmen, as indicated by high school graduation rank and American College Testing (ACT) scores; (2) 95 current students at St. Cloud State College who were classified as first quarter juniors and represented a normal curve distribution of grade point averages at St. Cloud State College. In order to have a comparison group, a random sample of 300 full-time students at St. Cloud State College was selected with the assistance of the Computer Services Department.

Because this study was conducted by students in a sociology class (Sociology 379, Research Methods, James Craik, Instructor), there were certain time restrictions in conducting the random sample interviews. Nevertheless, a high percentage of returns were obtains--256 of the 300 random group. For various reasons, mostly change of address and failure to contact by phone, the other 44 were not returned. Of the Self-Selection groups, 97 of the 101 freshmen returned their forms, and 89 of the 95 juniors returned theirs. The demographic characteristics indicate satisfactory randomness of the sample.

For the sake of convenience we will refer to the Self-Selection group of entering freshmen as Group I SSf. The Self-Selection group of predominantly juniors will be referred to as Group II SSj. The control group will be referred to as Group III SC. The study was conducted during the Winter Quarter of the 1972-73 school year. The size of the samples includes:

Group I SSf = 97
Group II SSj = 89
Group III SC = 256

As the purpose of this study was to indicate attitudinal differences of the three groups, selection of a measuring device was crucial. After consultation with Dr. Sikkink and Dr. Paul Ingwell, Director of Institutional Research at St. Cloud State College, it was decided to take advantage of the previous Campus Environment Study--a special and large-scale attitudinal project of the Central States Colleges and Universities Cooperative Research Program under the direction of H. M. Silvey in 1969 and 1970.[1] This study involved 29 Central States Colleges and Universities institutions and 19,217 full-time students. St. Cloud State College was one of the participating institutions. Percentile rank norms were established which allowed us to make comparisons of attitudinal data obtained in the Fall, 1969, and that obtained in the Winter, 1973. Analysis of the 1971 report (1969 data) was related to the following six areas of campus environment:

Area I: Academic Environment
Area II: Facilities and Services
Area III: Cultural Climate
Area IV: Communications
Area V: Community Relationships
Area VI: Ethical and Moral Values

Only Areas I--Academic Environment and IV--Communications were used in the Winter, 1973, study. Each area consisted of 25 statements, scored on a Lickert-type agree-disagree scale. Based on percentile rank distributions, St. Cloud State College ranked low on these two components and it was felt that they were the most pertinent to the Self-Selection Program. Using the 1969-base data, it is also possible to indicate changes within the St. Cloud State College over this period.

Area I--Academic Environment. This area is concerned with the setting, personnel, and conditions conducive to learning and intellectual development. The 25 statements dealing with the area emphasize competent instruction, high academic standards, respect for scholarship, and pride in high intellectual achievement. The institution is characterized by an atmosphere of academic excellence with high-type instruction and with good opportunities to learn.

---

[1] H. M. Silvey, Campus Environment Study Manual (University of Northern Iowa, Central State Colleges and Universities, 1971).

Area IV--Communications. This area provides opportunities to identify and evaluate various procedures and practices by which individuals of the college community relate to and understand each other: student to student, student to faculty, and all to academic government and institutional management.

Assumptions of Group Characteristics

The original study insinuated that all freshmen more favorably regard the campus than do those students who have been around long enough to become disillusioned. Despite the fact that the 1969 freshmen were measured prior to completion of the first grading period and the current survey was conducted during the second quarter, it was felt that the Self-Selection freshman group would have substantively more favorable attitudes. The 1971 report indicated that males were more favorable than females, and this was expected to continue. The disillusioned juniors who volunteered for the Self-Selection Program were expected to be more harsh in their opinions than the general student body. It was expected (and hoped for) that there would be a slight improvement on campus attitudes over the previous rating.

Control Variables

The original study included percentile rankings of the 29 institutions with breakdowns for sex and class in school (freshman, sophomore, etc.). In addition, we anticipated that scholastic achievement would have some effect. Generally, we expected those with higher grades to be more favorable. This was not investigated in the original study.

Hypotheses

1. Group I SSf will have substantively higher scores than any other group in 1973 or previous group of 1969.
2. Males will be more favorable than females.
3. Those with higher grades will be more favorable than those with lower grades.
4. The current campus will have higher rankings than that of the original survey.
5. A follow-up study in February, 1977, will indicate more favorable attitudes of the Group I SSf than of other seniors at St. Cloud State College.

Data Presentation

The tables present per cent of agreement and disagreement with the 25 statements constituting the two scale areas. The percentile rank of weighted scores was found by comparison with the tabular scores of the original study. They indicate changes in a condensed form from the base data. A higher percentile rank indicates more favorable attitudes on these two component areas. The computations and original rankings are explained in the manual.

Group Comparisons

TABLE 1a

Per Cent of Agreement of Responses to Area I: Academic Environment, by Groups

Response	Grp I SSf (N = 97)	Grp II SSj (n = 89)	Grp III SC (n = 252)
Strongly Agree	6	5	5
Agree	40	32	31
Undecided	23	23	23
Disagree	28	31	31
Strongly Disagree	4	9	9

TABLE 1b

Per Cent of Agreement of Responses to Area IV: Communications, by Groups

Response	Grp I SSf (n = 97)	Grp II SSj (n = 89)	Grp III SC (n = 252)
Strongly Agree	6	7	4
Agree	41	33	35
Undecided	32	31	28
Disagree	17	21	26
Strongly Disagree	5	8	7

TABLE 1c

Percentile Rank Distributions of Weighted Scores, by Group

Area I: Academic Environment

SC 1969 = 39
SC 1973 = 41
SSf 1973 = 62
SSj 1973 = 41

Area IV: Communications

SC 1969 = 45
SC 1973 = 48
SSf 1973 = 69
SSj 1973 = 56

Conclusions from Tables 1

Compared to all other groups, Group I SSf is much more favorable towards the college. There has been a very slight improvement of the campus ranking. The Group II SSj is much more favorable towards Area IV--Communications, than anticipated but is similar on Area I. It should be noted that none of the groups is highly favorable in their attitudes towards the college; but, in this era of disappointment with higher education, it is not a bad showing for the college and is highly favorable for the Self-Selection students.

Perhaps more important is that in 1969, St. Cloud State College freshmen scored 41 on Area I; and Group I SSf are much more favorable at 62. Similarly, 1969 St. Cloud State College freshmen scored 47 on Area IV; and Group I SSf scored 69. With reference to our first hypothesis, this is the most important point of the study. The Self-Selection Program freshmen are much more favorably inclined towards the college. It will be most significant to such programs to find what changes occur during the next four years of their academic experiences.

Sex Comparisons

TABLE 2a

Per Cent of Agreement of Responses to Area I: Academic Environment, by Sex

Response	Sex Male (n = 200)	Female (n = 226)
Strongly Agree	5	5
Agree	32	35
Undecided	23	23
Disagree	32	30
Strongly Disagree	9	7

TABLE 2b

Per Cent of Agreement of Responses to Area IV: Communications, by Sex

Response	Sex Male (n = 200)	Female (n = 226)
Strongly Agree	4	6
Agree	35	37
Undecided	28	30
Disagree	25	22
Strongly Disagree	8	6

TABLE 2c

Percentile Rank Distributions of Weighted Scores, By Sex

Area I: Academic Environment

SCSC Female 1969 = 38
SCSC Male 1969 = 40

SCSC Female 1973 = 40
SCSC Male 1973 = 49

Area IV: Communications

SCSC Female 1969 = 43
SCSC Male 1969 = 46

SCSC Female 1973 = 48
SCSC Male 1973 = 42

Conclusions from Tables 2

On Area I males are more favorable than females for both years. On Area IV, the hypothesis two is not valid for 1973, as females are more favorable. This may be the result of including the Self-Selection group in the comparisons.

TABLE 3g
Summary

Percentile Rank Distribution of Weighted Scores, by Grade Point Average and Group

AREA I: ACADEMIC EXCELLENCE

Group	Grade Point Average High (3.0+)	Medium (2.0 - 2.99)	Low (1.99--)
I SSf	60	66	60
II SSj	41	26	46
III SC	42	42	29

AREA IV: COMMUNICATIONS

Group	Grade Point Average High (3.0+)	Medium (2.0 - 2.99)	Low (1.99--)
I SSf	55	60	58
II SSj	42	37	46
III SC	38	41	37

In general, hypothesis 3 is not valid. However, grades do seem to have a definite effect. The medium grade point average students among the Group II SSj and the low grade point average students among the general campus contribute strongly to the dissatisfied students on the campus. This is especially true of the medium Group II SSj and probably indicates why they volunteered in such large numbers for the experimental program. It certainly indicates that Group II SSj, predominantly disillusioned third year students, is not similar to either of the other groups.

OVER-ALL CONCLUSIONS

Hypothesis 1 is verified. By almost any measure the Group I SSf have more favorable attitudes towards the St. Cloud State College campus.

Hypothesis 2 is partially true. There is a slight tendency for males to be more favorable than females; however, it does not seem to be a substantial difference.

Hypothesis 3 is not valid. In fact, the low grade point average students are remarkably similar to the high grade point average students. The medium Group II SSj and low grade point average Group III SC have the lowest opinions of St. Cloud State College.

Hypothesis 4 is generally true. There is a slight change for the better of attitudes between the Fall, 1969, and Winter, 1973. If the suspicion that general 1973 attitudes towards colleges and universities are more antagonistic is true, then they may be more significant than it appears.

Hypothesis 5 is not testable at this time. However, Group I SSf is so much more optimistic than the other groups that if a follow-up study continues to show this difference then there should be convincing evidence that it has a favorable effect on students' attitudes towards the college experience.

Our own critique of our study indicates the major weakness to be a failure to construct partial order tables for the control variables of sex and class. Second, there are several weak items on the two attitudinal scales; however, to change them would have eliminated the comparability with the earlier study and the use of the convenient percentile rank as a measure of difference.

CAMPUS ENVIRONMENT STUDY

The Campus Environment Study has been developed for use in assessing student opinion in various facets of campus atmosphere, conditions and circumstances. Your cooperation in completing this survey is appreciated, and the policy of protection of anonymity will be followed at all times.

Date ______________________ Sex ________ Class: Fr Soph Jr Sr (circle one)
Grade Point Average: __________

Please indicate your opinions relative to the following statements. The codes for your responses are as follows:

SA = Strongly Agree; A = Agree; U = Uncertain or No Opinion;
D = Disagree; SD = Strongly Disagree

	SA	A	U	D	SD
1. There is much more emphasis directed toward understanding than upon memorization of fact in most classes.	___	___	___	___	___
2. Most instructors are very thorough in the teaching of their subject matter.	___	___	___	___	___
3. Students are generally aware that several instructors are engaged in scholarly research and other creative work.	___	___	___	___	___
4. Stimulating classroom discussions are frequent.	___	___	___	___	___
[illegible] Most instructors establish course standards that are particularly difficult to attain.	___	___	___	___	___
6. High scholarship is a common goal of most students.	___	___	___	___	___
7. Open mindedness and objectivity are characteristic of most classes.	___	___	___	___	___
8. Many students on this campus are striving for high grades.	___	___	___	___	___
9. Considerable out-of-class preparation by students is necessary for most courses.	___	___	___	___	___
10. Instructors keep course materials up-to-date and examinations revised.	___	___	___	___	___
11. Examinations satisfactorily measure course assignments and presentations.	___	___	___	___	___
12. Most instructors here are dedicated teachers.	___	___	___	___	___
13. The academic atmosphere on this campus encourages students to go on to graduate work.	___	___	___	___	___
14. Instructors generally expect more work than most students are able to accomplish.	___	___	___	___	___
[illegible]. Curricular offerings are generally considered to be complete enough to satisfy most student program requirements.	___	___	___	___	___

	SA	A	U	D	SD
16. Course work requires so much time that little is left for other activities.					
[illegible]. There are adequate seminar, independent study, and field experience courses available to students.					
18. Most instructors recognize a superior student and are willing to take extra time to challenge him.					
19. There is a good balance between idealism and other points of view in the classroom.					
20. It is not difficult to determine the purposes and objectives of most courses.					
21. Good teaching is a characteristic of most instructors at this institution.					
22. Academic advising is adequate.					
23. Most instructors provide ample time for individual consultation.					
24. The institution provides a great many academic resources for student use.					
[illegible]. Ideas and issues brought up in class are often out-of-class discussion topics by students.					
26. It is easy for students to communicate with the administration.					
27. The expression of student opinions is encouraged.					
28. Instructors are easy to approach with questions concerning classwork.					
29. Generally, students feel quite comfortable in approaching instructors regarding a problem.					
30. Generally there is a friendly and cooperative relationship between departments.					
31. The administration and teaching faculty appear to cooperate well.					
32. Faculty members invite informal out-of-class discussions.					
33. There is close cooperation between campus student organizations.					
34. The student newspaper is a vital communication tool on campus.					

	SA	A	U	D	SD
35. The student newspaper serves as a sounding board to discuss administrative policies.	___	___	___	___	___
36. It is not difficult to find out what is going on around campus.	___	___	___	___	___
37. The student-faculty committees on this campus serve as an effective means of communication.	___	___	___	___	___
38. The student government is functioning satisfactorily.	___	___	___	___	___
39. The student newspaper provides a medium for exchange of intellectual ideas by faculty and students.	___	___	___	___	___
40. There is little difficulty experienced by the student in obtaining needed information about the institution.	___	___	___	___	___
41. Campus elections are well planned and publicized.	___	___	___	___	___
42. The editors of the campus newspaper have a great deal of freedom and latitude.	___	___	___	___	___
43. The administration attempts to keep students informed on matters of policy.	___	___	___	___	___
44. There is a friendly relationship between faculty and students.	___	___	___	___	___
45. Rumors are quickly disspelled on this campus by ready access to facts.	___	___	___	___	___
46. It is not hard to get to know instructors outside of class.	___	___	___	___	___
47. Students do not seem to be disturbed if they do not know what is going on.	___	___	___	___	___
48. Student government is a strong link between faculty and students.	___	___	___	___	___
49. The administration informs faculty and students promptly of policy changes.	___	___	___	___	___
50. Students keep informed about important campus issues.	___	___	___	___	___

FOLLOW-UP REPORT ON THE CAMPUS ENVIRONMENT STUDY

Winter, 1974

This study is a continuation of a previous study (Report on the Campus Environment Study)[1] and is not intended to be read separately but as an extension of the original; and, therefore, reference must first be made to the original. The purpose of this study and the previous study is to provide some insight into possible attitudinal changes of students involved in the liberalized curricula of the St. Cloud State College Self-Selection Program.

The two areas surveyed were those used in the original study--Academic Environment and Communications. The groups consisted of three separate classifications: Group I - Self-Selection Freshmen (SSf); Group II - Self-Selection Juniors (SSj); and Group III - random sample of St. Cloud State College students (SC). The purpose of this follow-up is to compare these groups in 1974 with the findings of the original study in 1973, using the same groups of individuals both times.[2] It was proposed that the SSf self-select students would have more favorable attitudes towards St. Cloud State College than other students because of their greater freedom.

Propositions Concerning Group Characteristics

It is the insinuation of the original study that the SSf would have substantively more favorable attitudes towards the two areas surveyed than other students. The original study indicated males more favorable than females. Both of these attitudes were expected to continue. The originally selected juniors (SSj) now having been in the program for a year should express more favorable opinions than previously. It was expected (and hoped for) that there would be an improvement on campus attitudes over the previous study.

---

[1] See "Report on the Campus Environment Study," St. Cloud State College, March, 1973, unpublished, available from Dr. Donald Sikkink or Barbara Grachek, St. Cloud State College, St. Cloud, Minnesota.

[2] Explanation of group designation: SSf - entering freshmen, Fall, 1972, who became a part of the Self-Selection Program. SSj - predominantly junior class students, Fall, 1972, who became a part of the Self-Selection Program. SC - random sample of all St. Cloud State College students; identified by year of survey.

Control Variables

In the 1972-73 study we anticipated those with higher grades would have more favorable attitudes than those with lower grades. Although it was found to have no significance in the 1972-73 study, it was again tested in 1974. This was not investigated in the initial study (1969).[3]

Hypotheses

In general, sophomores will have lower scores than freshmen; thus we anticipate the SSf Group--who are now sophomores--will remain the same as they were in 1973 if the program is successful.

1. Group I SSf will have substantively higher scores than the original sample sophomores to whom they are now compared.
2. Group II SSj will be more favorable than they were in 1973. This is due to the fact that the program has minimized their disillusions of the college campus.
3. Males will be more favorable than females. This is a projection from the original study.
4. Those with higher grades will be more favorable than those with lower grades.
5. The 1974 campus attitudes will be more favorable than those of the 1972-73 campus, reflecting national student attitudes.

---

[3] Campus Environment Study (University of Northern Iowa, Central State Colleges and Universities, 1971). Study was conducted in 1969.

6. A follow-up study in February, 1977, will indicate more favorable attitudes of Group I SSf than of other seniors at St. Cloud State College.

Data Presentation

The data is presented in the same format as it was in the original study. A higher percentile rank indicates more favorable attitudes on the two component areas. The non-availability of those students with a low G.P.A. (1.99--) is because they either raised their G.P.A., were dismissed by the College, or dropped the program.

Group Comparisons

TABLE 1a

Per Cent of Agreement of Responses to Area I:
Academic Environment, by Groups

1973 Response	Grp I SSf (N = 97)	Grp II SSj (N = 89)	Grp III SC (N = 252)
Strongly Agree	6	5	5

Strongly Agree	4	4	4
Agree	41	39	41
Undecided	20	22	20
Disagree	30	29	31
Strongly Disagree	5	6	4

TABLE 1b

Per Cent of Agreement of Responses to Area IV: Communications, by Groups

1973 Response	Grp I SSf (N = 97)	Grp II SSj (N = 89)	Grp III SC (N = 252)
Strongly Agree	6	7	4
Agree	41	33	35
Undecided	32	31	28
Disagree	17	21	26
Strongly Disagree	5	8	7

1974 Response	Grp I SSf (N = 51)	Grp II SSj (N = 49)	Grp III SC (N = 128)
Strongly Agree	3	7	3
Agree	35	35	35
Undecided	28	32	30
Disagree	25	20	24
Strongly Disagree	9	7	7

TABLE 1c

Percentile Rank Distributions of Weighted Scores by Groups and Year

Area I: Academic Environment

Group I	SSf	1973 = 62
	SSf	1974 = 57
Group II	SSj	1973 = 41
	SSj	1974 = 53
Group III	SC	1969 = 39 (Base Year)
	SC	1973 = 41
	SC	1974 = 57

Area IV: Communications

Group I	SSf	1973 = 69
	SSf	1974 = 39
Group II	SSj	1973 = 56
	SSj	1974 = 51
Group III	SC	1969 = 45 (Base Year)
	SC	1973 = 48
	SC	1974 = 41

Conclusions from Tables 1

Tables 1a and 1b show the pattern of total responses to the two component areas for both years of the Self-Selection Program participants. Comparisons can be made between the two calendar years 1973 and 1974. Table 1c is a summary of the more significant relationships and percentile rankings of the various St. Cloud State College groups measured at the different period of the three different studies.

With regards to hypothesis 1, it is apparent that Group I SSf is not as favorable towards the College in 1974 as they were in 1973 (Area I: 62 to 57;

Area IV: 69 to 30). With reference to hypothesis 5, there has been a substantial improvement of the overall (Group III SC, 1974) campus ranking. The Group II SSj showed a favorable gain towards Area I: Academic Environment. With reference to our second hypothesis, this should be noted as an important part of our study because juniors did increase. It appears that the Self-Selection Freshmen have lost some of their more favorable inclinations. It will be significant to find what changes occur during the next two years of their academic experiences.

Sex Comparisons

TABLE 2a

Per Cent of Agreement of Responses to Area I:
Academic Environment, by Sex

1973		Sex	
	Response	Male (N = 200)	Female (N = 226)
	Strongly Agree	5	5
	Agree	32	35
	Undecided	23	23
	Disagree	32	30
	Strongly Disagree	9	7

1974		Sex	
	Response	Male (N = 128)	Female (N = 129)
	Strongly Agree	4	4
	Agree	39	43
	Undecided	22	20
	Disagree	31	29
	Strongly Disagree	5	4

TABLE 2b

Per Cent of Agreement of Responses to Area IV: Communications, by Sex

1973

Response	Sex Male (N = 200)	 Female (N = 226)
Strongly Agree	4	6
Agree	35	37
Undecided	28	30
Disagree	25	22
Strongly Disagree	8	6

1974

Response	Sex Male (N = 128)	 Female (N = 129)
Strongly Agree	4	4
Agree	35	36
Undecided	30	30
Disagree	23	24
Strongly Disagree	8	6

TABLE 2c

Percentile Rank Distributions of Weighted Scores, By Sex

Area I: Academic Environment

SCSC Female 1969 = 38
SCSC Male 1969 = 40
SCSC Female 1973 = 40
SCSC Male 1973 = 49
SCSC Female 1974 = 60
SCSC Male 1974 = 55

Area IV: Communications

SCSC Female 1969 = 43
SCSC Male 1969 = 46
SCSC Female 1973 = 48
SCSC Male 1973 = 42
SCSC Female 1974 = 55
SCSC Male 1974 = 43

Conclusions from Tables 2

Tables 2a and 2b show the pattern of total responses to the two component areas for both years of the Self-Selection Program participants. Comparisons can be made between the two calendar years 1973 and 1974. Table 2c indicates that in 1974 on both component areas (I and IV) females were more favorable than males. This makes hypothesis 3 invalid for 1974--a change from previous measures. This may be the result of including the Self-Selection group in the comparisons.

		Grade Point Average	
I SSf	36	42	50
II SSj	51	51	0
III SC	45	38	45

Conclusions from Tables 3

Tables 3a through 3f again give percent of agreement of responses to Areas I and IV comparing high, medium, and low grade point averages (GPA). These tables are reported but, contrary to our hypothesis 4, grades make no significant difference.

OVER-ALL CONCLUSIONS

Hypothesis 1, Group I SSf will have higher scores than the original sample sophomores to whom they are now compared, is partially true. Although they dropped some (Area I: 62 to 57; Area IV: 69 to 39), this is to be expected. The SSf scored more favorable than the SSj in the area of Academic Environment (57 to 53). They had the same ranking in that area as Group III, SC (57 to 57).

Hypothesis 2 is not verified. The 1974 SSj have a more favorable attitude towards the St. Cloud State campus than they did in 1972-73 on component area I (53 to 41) but decreased on component IV (56 to 51).

Hypothesis 3, that males are more favorable than females, is not valid. In 1973 males were higher in Area I but lower in Area IV. In 1974, females are higher in both areas. There seem to be sex differences, but they are not consistent from year to year on our data.

Hypothesis 4 was not testable. We could not compare the low G.P.A. (1.99--) with the high G.P.A. (3.0+) because of the non-availability of the low G.P.A. group. However, we could test the high G.P.A. (3.0+) against the medium G.P.A. (2.0-2.99) group. This demonstrated no substantial difference.

Hypothesis 5 is valid. The 1974 campus showed substantial gain over the 1973 campus (57 to 41).

Hypothesis 6 refers to 1977, and data is not now available.

Considering all factors, the major trend over the entire campus has been an increase in satisfaction in Academic Environment (Area I) and a decrease in satisfaction with Communications (Area IV). This holds true for all groups (see Table 1c). The campus sample was not as randomly selected in 1974 as it was in 1973; however, it should serve as an adequate comparison with the Self-Selection Program.

APPENDIX H

SURVEY REPORT

ST. CLOUD STATE COLLEGE
ST. CLOUD, MINNESOTA 56301

SELF-SELECTION PROGRAM

SELF-SELECTION SURVEY REPORT

At the end of the Spring Quarter, 1973, the students on the Self-Selection Program were asked to complete a one-page survey form (see Appendix A). Questions 1, 2, 3, and 4 of this form were also presented to a number of St. Cloud State students in regular degree programs so that a comparison of reactions would be possible.

In the Self-Selection group, we call "freshman" those students who entered the Self-Selection Program as entering freshmen; 81 of the 90 students completed the form (90%). The "current" group consists of students who entered the Self-Selection Program after starting at St. Cloud State College in a regular program; 75 of the 88 students completed the form (85%). The comparison sample consisted of 356 students.

The results of this survey are reported on the attached tables.

TABLE I

COMPARISON OF GROUPS ON THE CHARACTERISTICS OF SEX AND CREDITS COMPLETED

Number	"Freshman"	vs.	"Current"	t	Combined Self-Selection	vs.	Comparison Sample	t
Male	30 (37%)		36 (48%)	0.89	66 (42%)		164 (46%)	.552
Female	51 (63%)		39 (52%)	1.04	90 (58%)		192 (54%)	.630
	81		75		156		356	
Total Credits Completed								
0 - 50	69 (92%)		5 (8%)	5.27***	74 (54%)		139 (39%)	2.10**
51 - 100	6 (8%)		33 (53%)	2.03**	39 (28%)		112 (32%)	.465
101 - 150	0 (-)		22 (35%)	-	22 (16%)		86 (24%)	.804
151 - 200	0 (-)		2 (3%)	-	2 (1%)		18 (5%)	.256
	75		62		137		355	

Comments: There are no statistically significant differences in the male-female make-up of the groups. An expected statistically significant difference exists in the total credits completed area when freshman and current students are compared. This difference carrys over to the comparison of 0-50 credits completed for the combined self-selection group and the comparison sample with a smaller percentage of the comparison sample having completed 0-50 credits.

The impact of this last difference is unknown. However, fewer freshman than current students found "100% of their courses worthwhile;" more freshman than current students "wished they could transfer;" fewer freshman than current students found instruction quality superior or excellent and far fewer freshman than current students expressed they were "almost certain" about finishing a college degree; so it seems reasonable to assume that these differences worked against the self-selection combined group when compared with the comparison sample.

*** Significant at less than the .01 level
** Significant at less than the .05 level

TABLE II

COMPARISON OF GROUPS ON QUESTION 1

"What percentage of your courses did you find worthwhile this year?"

Number	"Freshman"	"Current"	t	Combined Self-Selection	Comparison Sample	t
100%	12 (15%)	20 (27%)	.787	32 (21%)	19 (5%)	1.54
75%	46 (57%)	39 (53%)	.369	85 (55%)	174 (50%)	.753
50%	21 (26%)	10 (14%)	.752	31 (20%)	118 (34%)	1.50
25%	2 (2%)	3 (4%)	.124	5 (3%)	39 (11%)	.559
0%	0 (-)	1 (1%)	-	1 (1%)	1 (0%)	-
	81	73		154	351	

Comments: None of the differences reach the .01 or .05 level of statistical significance but two differences approach the .10 level of significance. These two are

(1) More self-selection students found 100% of their courses worthwhile (21% vs. 5%).

(2) Fewer self-selection students found only 50% of their courses worthwhile (20% vs. 34%).

TABLE III

COMPARISON OF GROUPS ON QUESTION 2

"What reaction best expresses your present attitude?"

Response	"Freshman"	"Current"	t	Combined Self-Selection	Comparison Sample	t
I'm glad I selected St. Cloud State	38 (47%)	34 (47%)	-	72 (47%)	123 (35%)	1.65*
St. Cloud State is OK	31 (38%)	29 (40%)	.158	60 (40%)	176 (50%)	1.34
I'm not sure this is the college for me	7 (9%)	7 (10%)	.063	14 (9%)	30 (8%)	.111
I wish I could transfer to another college	5 (6%)	1 (1%)	.206	6 (4%)	18 (5%)	.099
I can't tolerate St. Cloud State	0 (-)	2 (3%)	-	2 (1%)	6 (2%)	.093
	81	73		154	353	

Comments: None of these differences is statistically significant at the .01 or .05 level of significance. One difference is significant at the .10 level. That difference is the 47% of self-selection students who respond they are "glad they selected St. Cloud State" as compared to the 35% of the comparison sample who make such a response.

* Significant at the .10 level.

TABLE IV

COMPARISON OF GROUPS ON QUESTION 3

"What is your judgment of the quality of instruction at St. Cloud State College?"

Response	"Freshman"	"Current"	t	Combined Self-Selection	Comparison Sample	t
Superior	1 (1%)	2 (3%)	.108	3 (2%)	3 (1%)	.100
Excellent	23 (28%)	24 (33%)	.372	47 (31%)	89 (26%)	.619
Average	51 (63%)	44 (61%)	.200	95 (62%)	237 (68%)	1.04
Poor	6 (7%)	0 (-)	-	6 (4%)	17 (5%)	.099
Inferior	0 (-)	2 (3%)	-	2 (1%)	1 (0%)	-
	81	72		153	347	

Comments: None of the differences are statistically significant at the .01, .05, or .10 level.

TABLE V

COMPARISON OF GROUPS ON QUESTION 4

"Do you think you will finish a college degree at St. Cloud State College?"

Response	"Freshman"	"Current"	t	Combined Self-Selection	Comparison Sample	t
Almost Certain	23 (28%)	47 (64%)	1.52	70 (45%)	151 (43%)	.279
Think I will	24 (30%)	12 (15%)	.910	36 (23%)	89 (25%)	.235
Uncertain	18 (22%)	9 (13%)	.562	27 (18%)	52 (15%)	.345
Probably won't	5 (6%)	2 (3%)	.162	7 (5%)	22 (6%)	.098
Almost certain will not	11 (14%)	3 (4%)	.474	14 (9%)	37 (11%)	208
	81	73		154	351	

Comments: None of these differences is significant at the .01, .05, or .10 level but the difference between freshman self-selection and current self-selection on the question of "almost certain to finish" approaches significance at the .10 level. The reason for this difference seems obvious--as students approach graduation, there is a greater certainty about degree completion.

Self-Selection Group: Response to Question 5

"Selection of Courses"

Response	"Freshman"	"Current"
In selecting courses this year, I have selected courses in many fields.	40 (50%)	26 (36%)
In selecting courses this year, I have selected courses in primarily one field.	13 (16%)	26 (36%)
In selecting courses this year, I have selected courses in many fields and have found one field of particular interest.	27 (34%)	20 (28%)
	80	72

Responses 2 and 3 provided open ended responses to indicate which fields were of prime interest either initially or as a result of selecting courses in many fields and then determining a particular area of interest. The fields indicated were as follows:

	Response 2		Response 3	
Field	"Freshman"	"Current"	"Freshman"	"Current"
Accounting	1	1	-	1
Anthropology	-	-	1	-
Art	-	2	5	-

SELF-SELECTION GROUP: RESPONSE TO QUESTION 6

"What is the thing you like most about self-selection?"

Response	"Freshman"	"Current"
1. It produces the education I want. ("self-selection allows me to express my individuality;" "being able to take classes that are valuable to me;" "I didn't feel stifled as most students around me were;" "you have freedom, its more challenging, less routine;" "to center my attention in taking courses which I desire;" "you can experiment and learn more what you want;" "to explore various areas which are of interest;" "the biggest thing is getting deep into your field when you are a freshman;" "I'm able to avoid classes I don't need.")	45 (56%)	41 (55%)
2. It allows me to avoid general education requirements. ("not having to worry about those worthless general eds.;" "not being restricted to taking general ed. courses;" "you are exposed to a lot more than the general ed. requirements have to offer;" "don't have to take general education requirements unless I want to.")	26 (32%)	15 (20%)
3. It reduces worry and red tape. ("I do not have to worry about what I must take;" "freedom to pursue interests without worrying about requirements;" "knowing that whatever I take is applying toward a degree;" "it allows me to seek my own level without all the red tape;" "the chance to shop around and not be penalized;" "lack of pressure;" "being able to take whatever classes I want to without feeling that I'm getting behind."	7 (9%)	12 (16%)
4. Miscellaneous responses or No response.	3 (3%)	7 (9%)
	81	75

SELF-SELECTION GROUP: RESPONSE TO QUESTION 7

"What is the thing you liked least about self-selection?"

	Response	"Freshman"	"Current"
1.	I don't think anything is wrong. ("Nothing;" "no complaints;" "nothing I can think of;" "I like everything; I would like to see more people on it;" "I am thankful for this program."	24 (30%)	20 (27%)
2.	Blank space - no response.	14 (17%)	17 (23%)
3.	I felt a lack of guidance-counseling. ("lack of guidance and career information;" "program advisors should have more verbal contact with students;" "I wish I had a little help or explanation of courses;" "sometimes I take courses ahead of myself."	10 (12%)	5 (7%)
4.	I dislike not being able to work for a minor. ("no minors allowed;" "can't get a minor."	6 (7%)	6 (8%)
5.	I worry about the acceptance of a self-selection degree. ("I don't think employees will be as idealistic as I am;" "fear it will not be accepted;" "I'm worried about getting into graduate school;" "can we get a job?"	5 (6%)	7 (9%)
6.	I had registration problems. ("difficulties in registration due to being a freshman;" "upper classmen are able to choose first.")	5 (6%)	1 (1%)
7.	I dislike filling out our project questionnaries. ("filling out these questionnaries;" "filling out surveys, I'm not joking, it is the only bad thing I've found.")	3 (4%)	6 (8%)
8.	I think restrictions are desirable. ("due to a certain lack of motivation;" "it is depressing not to have directions.")	3 (4%)	2 (3%)
9.	I feel others do not cooperate. ("I have run into pressure from department heads and instructors;" "some courses are still off limits unless you get special permission;" "resentment of other students.")	2 (2%)	3 (4%)
10.	Miscellaneous responses.	9 (11%)	8 (11%)
		81	75

SELF-SELECTION GROUP: RESPONSE TO QUESTIONS 8 AND 9

Question 8 concerning total credits completed under self-selection is being used for other purposes and will not be reported here.

Question 9: "Do you feel St. Cloud State College should have a program in Self-Selection available to all students?"

Response	"Freshman"	"Current"
YES	72 (89%)	65 (89%)
NO	9 (11%)	8 (11%)
	81	73

For statistical analysis of significant difference, the following text was used: Garret, Henry E. Elementary Statistics, 2nd Edition (New York: David McKay Co., Inc.), 1962, p. 135.

$$SE = \sqrt{PQ\left(\frac{1}{N_1} + \frac{1}{N_2}\right)}$$

APPENDIX A

SURVEY FORM

REACTIONS - 1972-73
St. Cloud State College
St. Cloud, Minnesota 56301
May, 1973

PLEASE DO NOT PUT YOUR NAME ON THIS FORM

COMPLETE AND RETURN TO PA-209 BY FRIDAY, JUNE 1, 1973

Male_____ Female_____

Approximate Number of Credits Completed at the end of Spring Quarter, 1973: _______

1. What percentage of your courses did you find worthwhile this year?
   _____100% _____75% _____50% _____25% _____0%

2. Which reaction best expresses your present attitude?
   _____I'm glad I selected St. Cloud State College.
   _____St. Cloud State College is ok.
   _____I'm not sure this is the college for me.
   _____I wish I could transfer to another college.
   _____I can't tolerate St. Cloud State College.

3. What is your judgment of the quality of instruction at St. Cloud State College during the past year?
   _____Superior _____Excellent _____Average _____Poor _____Inferior

4. Do you think you will finish a college degree at St. Cloud State College?
   _____Almost certain
   _____Think I will
   _____Uncertain
   _____Probably won't
   _____Almost certain will not

5. In selecting courses this year, I have
   _____Selected courses in many fields.
   _____Selected courses in primarily one field. Which one: __________________
   _____Selected courses in many fields and have found one field of particular interest. Which one: ______________________

6. What is the thing you have liked most about self-selection?

7. What is the thing you have liked least about self-selection?

8. Of your total credits completed above, how many of these have been taken under self-selection (i.e., since First Summer Session, 1972)? __________

9. Do you feel St. Cloud State College should have a program in Self-Selection available to all students.
   _____Yes _____No

TABL

COMPARISON OF GROUPS ON THE CHARACTERISTICS OF SEX AND CREDITS COMPLETED

Number	"Freshman"	vs	"Current"	t	Combined Self-Selection	vs	Comparison Sample	t
Male	14 (39%)		16 (43%)	.222	30 (41%)		98 (42%)	.097
Female	22 (61%) 36		21 (57%) 37	.266	43 (59%) 73		136 (58%) 234	.115
Total Credits Completed								
0 - 50	1 (3%)		2 (6%)	.112	3 (5%)		17 (7%)	.127
51 - 100	29 (94%)		1 (3%)	3.121***	30 (45%)		40 (17%)	2.556**
101 - 150	1 (3%)		15 (43%)	.788	16 (24%)		69 (30%)	.477
151 - 200	0 (-) 31		17 (49%) 35	-	17 (26%) 66		103 (45%) 229	1.469

Comments: As the same as last year's study, there is no statistically significant difference in the male-female make-up of the groups. An expected statistically significant difference exists in the total credits completed area when the self-selection "freshman" and "current" are compared. This differnce carrys over to the comparison of the 51-100 credits completed area for the combined self-selection group and the comparison sample with a smaller percentage of the comparison sample having completed 51-100 credits.

The only areas where this may have any impact is in the areas that fewer freshman than current students found 100% of their courses worthwhile and far fewer freshman were "almost certain" about finishing a college degree; thus, if anything, these differences worked against the self-selection combined group when compared with the comparison sample.

*** Significant at less than the .01 level.
** Significant at less than the .05 level.

TABLE II

COMPARISON OF GROUPS ON QUESTION 1

"What percentage of your courses did you find worthwhile this year?"

Number	"Freshman"	"Current"	t	Combined Self-Selection	Comparison Sample	t
100%	5 (15%)	12 (32%)	.719	17 (24%)	21 (9%)	1.263
75%	25 (71%)	20 (54%)	1.177	45 (63%)	123 (53%)	1.156
50%	3 (9%)	4 (11%)	.086	7 (10%)	76 (33%)	1.258
25%	2 (6%)	1 (3%)	.112	3 (4%)	12 (5%)	.072
0%	- (-)	- (-)	-	- (-)	- (-)	-
	35	37		72	232	

Comments: As in the previous year's evaluation, none of the differences reached the .01 or .05 level of statistical significance, but two differences approached the .10 level of significance. These two are

(1) More self-selection students found 100% of their courses worthwhile (24% vs 9%).

(2) Fewer self-selection students found only 50% of their courses worthwhile (10% vs 33%).

TABLE III

COMPARISON OF GROUPS ON QUESTION 2

"What reaction best expresses your present attitude?"

Response	"Freshman"	"Current"	t	Combined Self-Selection	Comparison Sample	t
I'm glad I selected St. Cloud State.	22 (61%)	18 (49%)	.760	40 (55%)	120 (51%)	.438
St. Cloud State is OK.	10 (28%)	15 (41%)	.664	25 (34%)	97 (41%)	.638
I'm not sure this is the college for me.	3 (8%)	1 (3%)	.172	4 (6%)	11 (5%)	.076
I wish I could transfer to another college.	- (-)	2 (5%)	-	2 (3%)	2 (1%)	.142
I can't tolerate St. Cloud State.	1 (3%)	1 (3%)	-	2 (3%)	4 (2%)	.076
	36	37		73	234	

Comments: None of these differences is statistically significant at the .01, .05, or .10 level of significance. As compared to last year's survey, at that time the first response indicated a difference at the .10 level with 47% of the combined self-selection group "glad" vs. 35% of the comparison sample.

TABLE IV

COMPARISON OF GROUPS ON QUESTION 3

"What is your judgment of the quality of instruction at St. Cloud State College?"

Response	"Freshman"	"Current"	t	Combined Self-Selection	Comparison Sample	t
Superior	- (-)	2 (5%)	-	2 (3%)	5 (2%)	.080
Excellent	14 (41%)	15 (41%)	-	29 (40%)	87 (38%)	.191
Average	20 (56%)	19 (51%)	.313	39 (54%)	135 (58%)	.444
Poor	- (-)	1 (3%)	-	1 (1%)	3 (1%)	-
Inferior	1 (3%)	- (-)	-	1 (1%)	1 (0%)	.100
	35	37		72	231	

Comments: None of the differences are statistically significant at the .01, .05, or .10 level--same results as the 1972-73 survey.

TABLE V

COMPARISON OF GROUPS ON QUESTION 4

"Do you think you will finish a college degree at St. Cloud State College?"

Response	"Freshman"	"Current"	t	Combined Self-Selection	Comparison Sample	t
Almost Certain	20 (56%)	34 (92%)	3.119**	54 (74%)	189 (81%)	1.123
Think I Will	8 (22%)	1 (3%)	.448	9 (12%)	21 (9%)	.252
Uncertain	3 (8%)	2 (5%)	.130	5 (7%)	10 (4%)	.251
Probably Won't	2 (6%)	- (-)	-	2 (3%)	1 (-)	.174
Almost Certain Will Not	3 (8%)	- (-)	-	3 (4%)	13 (6%)	.135
	36	37		73	234	

Comments: Only one of these is significant at the .01 level of significance--more "current" self-selection students than "freshman" self-selection students are "almost certain" to graduate. The reason for this difference seems obvious--as students approach graduation, there is a greater certainty about degree completion.

**Significant at .01 level

SELF-SELECTION GROUP: RESPONSE TO QUESTION 5

"Selection of Courses"

Response	"Freshman"	"Current"
In selecting courses this year, I have selected courses in many fields.	10 (28%)	12 (32%)
In selecting courses this year, I have selected courses in primarily one field.	18 (50%)	21 (57%)
In selecting courses this year, I have selected courses in many fields and have found one field of particular interest.	8 (22%)	4 (11%)

Responses 2 and 3 provided open-ended responses to indicate which fields were of prime interest either initially or as a result of selecting courses in many fields and then determining a particular area of interest. The fields indicated were as follows:

Field	Response 2 "Freshman"	Response 2 "Current"	Response 3 "Freshman"	Response 3 "Current"
Urban Affairs	-	1	-	-
Art	1	3	-	1
Biology	4	1	1	-
Business	1	-	1	-
Criminal Justice	1	1	-	-
Economics	-	1	-	-

Geography	-	2	-	-
Geography-Political Science	-	2	-	-
Mass Communication	1	-	-	1
Mathematics	1	-	2	-
Mathematics-Science	2	-	-	-
Music	-	1	-	-
Psychology	1	3	1	-
Psychology-Sociology	-	1	-	1
Recreation	1	-	-	-
Science	3	-	-	-
Sociology	1	-	1	-
Social Work-Psychology	-	1	-	-
Spanish-English	-	1	-	-
Speech	-	1	-	-
Speech-Traffic Safety	-	1	-	-
Theatre	1	1	-	1

SELF-SELECTION GROUP: RESPONSE TO QUESTION 6

"What is the thing you like most about self-selection?"

Response	"Freshman"	"Current"
1. Freedom of choice--education I want. ("do what I feel is best for me;" "plan your own career;" "feel greater responsibility in my classes because I choose them myself;" "the options;" "being able to choose classes when you want to;" "independence!" "total decision making on class selection;" "flexibility of the program;" "freedom;" "independence."	24 (67%)	22 (59%)
2. It allows me to avoid general education requirements. ("not having to take all requirements in gen ed;" "freedom from a rigid general ed program;" "not having to worry about filling general ed. requirements;" "don't have required general eds.; I usually take some gen. eds every year, but I don't want to *have* to take them;" "not being trapped in by required courses."	6 (17%)	10 (27%)
3. It reduces worry and red tape. "Ease in registration, no need to apply for major;" "take any course you want without worrying about pre-requisites or permission slips, etc.;" "being able to take 300-400 level courses;" "free from taking pre-requisites."	5 (14%)	3 (8%)
4. Miscellaneous responses or No response.	1 (3%)	2 (5%)
	36	37

SELF-SELECTION GROUP: RESPONSE TO QUESTION 7

"What is the thing you liked least about self-selection?"

	Response	"Freshman"	"Current"
1.	I don't think anything is wrong. ("nothing;" "I can't say as I'm unhappy with anything;" "there is nothing about self-select that I dislike.")	5 (14%)	7 (19%)
2.	Blank space - no response	9 (25%)	12 (32%)
3.	I felt a lack of guidance-counseling. ("Not having a major adviser is tough;" "people who do select a field of major concentration do not have an appointed major adviser who can assist them with problems in that particular area.")	1 (3%)	3 (8%)
4.	I dislike not being able to work for a minor. ("would like to be able to get minors;" "not being able to get a minor.")	4 (11%)	2 (5%)
5.	I worry about the acceptance of a self-selection degree. ("wonder how other colleges will regard my degree when it comes to applying for graduate school;" "uncertainty about jobs with this type diploma;" "lack of job security after graduation.")	7 (19%)	1 (3%)
6.	I had registration problems. ("confusion in office about my major--they keep putting "not admitted.")	1 (3%)	-
7.	I dislike filling out our project questionnaires. ("filling out these forms!" "no complaint except questionnaires."	2 (6%)	4 (11%)
8.	I feel others do not cooperate. ("other people who aren't on the program...who want to be on the program also, think you're a real creep and getting away with things."	2 (6%)	--
9.	I wish I could get a teaching degree on this program. ("that I can't teach with a B.A.")	--	2 (5%)
10.	Miscellaneous responses.	5 (14%)	6 (16%)
		36	37

COMPARISON SAMPLE: RESPO[illegible]S TO QUESTIONS 5 AND 6

Questions 5: "Are you aware of a new degree--Bachelor of Elective Studies--being proposed for St. Cloud State."

Response	Comparison Sample
Yes	119 (51%)
No	115 (49%)
	234

Question 6: "If yes to No. 5, would you apply for admission into this degree program?"

Response	Comparison Sample
Yes	22 (18%)
No	97 (82%)
	119

SELF-SELECTION GROUP: RESPONSE TO QUESTION 8

"Do you feel St. Cloud State College's proposal for a permanent program (BES) is a good idea?"

Response	"Freshman"	"Current"
Yes	34 (94%)	35 (95%)
No	2 (6%)	2 (5%)
	36	37

For statistical analysis of significant difference, the following text was used: Garret, Henry E. Elementary Statistics, 2nd Edition (New York: David McKay Co., Inc.), 1962, p. 135.

$$SE = \sqrt{PQ\left(\frac{1}{N_1} + \frac{1}{N_2}\right)}$$

APPENDIX I

BACHELOR OF ELECTIVE STUDIES

Section I
GENERAL INFORMATION

A. College: St. Cloud State College

B. Title of new program: Bachelor of Elective Studies (Not a new program. It is a new degree title which identifies students who earn a college degree by completing 192 quarter credits of their own choosing.

C. Indicate whether this program will be a major or a minor: N/A

D. Proposed implementation date: September 1, 1974

E. Department: College-wide

F. Field or discipline: College-wide

G. School or division of college: College-wide

H. Degree to be granted in new program: Other: Bachelor of Elective Studies

I. Name of person to whom questions regarding this proposal should be directed: Donald Sikkink, Barbara Grachek -- Directors, Self-Selection Experiment

J. Name and title of person who will administer new program if different from the name immediately above: The immediate administration will be by the persons named above. Ultimately the program will be administered by the Office for Academic Affairs.

K. College and sub-college agencies that have reviewed this proposed program and the date of their review:

Departments	Not applicable	Date	
School	Not applicable		
Coll. Curr. Coun.	Approved		3-28-74
College Senate	Approved		4-10-74
Others (specify)	General Ed. Comm. - Approved		3-26-74
	State College Board		5-21-74

Section II

PROGRAM DEVELOPMENT

A. Describe the type of student this program is designed to serve both now and five years from now if any change is anticipated.

This degree request is based on the Self-Selection Experimental Program at St. Cloud State College, which is funded by The Department of Health, Education, and Welfare's Fund for the Improvement of Postsecondary Education. The experiment has been in operation for three years and serves the needs of the following students:
1. Students who wish to design their own educational programs.
2. Students with limited interest in specific occupational/professional training.
3. Older, part-time students who desire continuing education for a degree and find existing degree requirements do not fit their needs.

No change in the type of student for this degree is predicted in the next five years.

B. Describe the nature and extent of the student demand for this program.

When the experimental program began, 350 upper-level students applied for the 100 positions open to them, and 150 first-quarter freshmen applied for the 100 positions allotted to them. The directors of the program have at least one or two inquiries daily on admission possibilities to the experiment. It is estimated that 300-800 students at St. Cloud State College would seek admission to the Bachelor of Elective Studies degree program.

C. Indicate the extent, if any, to which people other than faculty and administration were involved in the development of this program.

The experimental program has an Advisory Committee made up of four administrators, four teaching faculty, and two students from the experiment. The Department of Health, Education, and Welfare is also involved since they fund the experiment; and one of the directors attends a yearly conference in Washington, D.C. pertaining to projects designed to improve undergraduate education. Dr. Leonard S. Feldt, University of Iowa, has also consulted with the directors concerning measurement and evaluation of the experiment. The original experiment was endorsed by the Curriculum Council and General Education Curriculum Council of St. Cloud State College.

D. Cite evidence that illustrates demand for graduates with the training this new program would provide. Please indicate the sources of evidence.

Since the program is not necessarily designed to prepare students vocationally/professionally, we have attempted no measure of "need" for graduates. The approach for this degree is that some students need to be decision-makers in planning their own programs in order to benefit from education. The Bachelor of Elective Studies would provide the student this option.

Students with concerns about employment or qualifying for advanced professional training should be urged at the earliest possible date to contact employers or potential professional schools about the acceptability to those groups of a self-selection degree.

E. Describe the relationship of the proposed program to existing programs offered by your college.

The proposed degree would use existing courses. No new courses or faculty would be required. This proposal requests permission to use a different degree title for students who use these courses in self-selecting their own program of study.

F. Indicate which other education institutions in the state offer a similar program and contrast the program proposed by your college with existing programs. Consult HECC Curriculum Inventory for assistance.

The University of Minnesota and Mankato State College are two public institutions offering degree possibilities somewhat similar to this proposal. Descriptive material on these two programs is attached to this request.

G. Describe any plans to coordinate this program with programs in other institutions. Indicate individuals involved in this coordination.

Coordination with other institutions does not seem necessary. Approval is sought only for a new degree within our own institution and its present structure of course offerings. We would be pleased to share all research results with other institutions.

Section III

ACADEMIC DESCRIPTION OF THE PROGRAM

A. List the program objectives.

1. To provide students maximum latitude in planning degree patterns.
2. To provide students an opportunity to choose what they learn and how they learn it.
3. To provide students with an opportunity for self-motivation through a process where one makes a choice and then works to prove it was the correct choice.
4. To provide students an opportunity to develop more positive attitudes toward their learning by allowing them more freedom in selection of their courses.
5. To provide students an opportunity to accelerate their college program if they so desire.

B. List admission requirements and any prerequisites.

1. Students must meet the general admission standards of St. Cloud State College (presently a H.S.R. of 33 or an ACT score of 15 for freshmen and a 2.00-C average for transfer students).
2. Any new student may enter the degree program who meets the admission requirements outlined in No. 1.
3. Students enrolled at St. Cloud State College either currently or previously may enter the degree program if they have an over-all 2.00 H.P.R.

C. Provide complete information concerning all degree requirements, indicating the total number of credits required, the distribution pattern, any foreign language requirement or other research tool requirements, any thesis requirements or research project requirement, and any other special requirements.

The Bachelor of Elective Studies Degree requires:
1. The completion of 192 quarter credits with a 2.00 average.
2. The student must meet the residency requirement of St. Cloud State College; that is, the student must earn 45 of the last 96 credits at St. Cloud State, and the last 8 credits before graduation must be in residence; junior college transfers must earn at least 96 credits in residence.
3. The student must earn at least 48 credits in upper division (300-400 level courses).
4. The maximum credits which can be completed in any one academic discipline is 96.
5. No major or minor is required in this degree program, but majors and minors may be earned in two ways by those students choosing them:
    a. Departments can indicate in the College Bulletin if they will grant a B.E.S. major or minor to a student who completes 48 credits or 36 credits of his choice. The departments may not specify courses for this major, but they may specify course level (e.g., 50% of the courses at the 300-400 level).

b. Students may present a self-selected pattern of courses to a department for approval to be granted a major or minor from that department as part of the B.E.S. degree.

A special feature of this program allows waiver of student load recommendations and requirements. Students may accelerate their degree program if they so desire.

D. To what extent will independent study, internships, or practicums be a part of this program.

Independent study, internships, practicums, and foreign study are allowed. No particular offerings in these areas are planned, but individual offerings from departments may be applied to the Bachelor of Elective Studies degree.

E. Describe any particularly innovative or experimental features of this program not described above.

The innovative and experimental features have been described.

. Describe plans for program evaluation.

The experimental program is presently being evaluated and will continue to be evaluated for the next two years on the following items:

1. What are the characteristics of the students who applied for the program?
2. How many of the required general education courses did the project students complete?
3. How many of the required courses in a major did the project students complete?
4. What is the grade record of the project students?
5. What is the drop-out record of the project students?
6. What is the rate of progress of project students?
7. What is the level of course selection of project students?
8. What is the level of degree completion of project students?
9. What course and instructor selection takes place by project students?
10. What is the attitude of the project students concerning the project and education?
11. What kind of courses do the project students select?
12. What is the rate of completion of courses selected?
13. What is the employment potential of students who have completed the degree?

These items will be evaluated by the directors of the program, and results will be forwarded to the Curriculum Council and the Vice President for Academic Affairs.

G. Describe the media resources available to support this program. Indicate generally the nature of the library holdings and other media resources relative to this proposed program. Include in your remarks both strengths and weaknesses and indicate how much money is definitely committed to the further expansion of library holdings and other media materials in the area of this program.

As this degree does not involve any additional course offerings or activities to the present curriculum, no additional media resources or funding for such is required.

Dept.	Course Title	Number	[1] Level	[2] Status	Frequency of Offering	Date of Most Recent Offering	[3] Enroll.	Sch.	[4] Credit Hours

ALL COLLEGE COURSES COULD BE RELATED TO THE NEW PROGRAM

[1] Indicate level with use of terms lower, upper, undergrad-grad (u-g), graduate (g).

[2] Indicate by letter as follows:

O Currently offered
A Approved but not yet offered
P Proposed but not yet approved

[3] Estimated enrollment if the course has not been offered; if it has been offered give actual enrollment during latest quarter.

[4] Weekly student contact hours.

Listings by sub-headings.

Section IV

FACULTY

A. Statistical summary of degrees held by the faculty involved in this program:

(1)	Number holding doctorate	na
(2)	Number having all course work for doctorate completed	na
(3)	Number holding a specialist degree (sixth year)	na
(4)	Number holding a master's degree but not one of the above	na
(5)	Number holding less than master's degree	na

B. It is recognized that a faculty member may have special competencies or a degree other than the doctorate that is considered terminal for a particular field. Please feel free to call special attention to the vita of such an individual by listing the person's name immediately below.

na

C. The purpose of this section is to permit the institution opportunity to demonstrate the professional competence of the faculty members for this program and to indicate the extent to which these faculty members teach courses that are related to this program.

na

Section V

FACILITIES AND EQUIPMENT

A. What facilities and equipment will be required to initiate this program?

None

B. Are these facilities currently available?

No additional facilities needed.

C. If adequate facilities do not exist, how are they to be provided?

na

D. What additional facilities and equipment will be required during the first five years of the program?

None

Section VI

PROJECTIONS

	First Year		Fifth Year	
A. Number of students antiticpated in the program **	Per Qtr	Per SS	Per Qtr	Per SS
Full-time	200	40	500	100
Part-time	25	5	100	20

(2) Student Activity	na	na
(3) Revenue Bonds	na	na
(4) Federal Grants	na	na
(5) Private Gifts and Grants	na	na

**Note: The Curriculum Council imposed an enrollment limitation of 700 students the first two years with no more than 200 new freshmen admitted each year. This enrollment limitation will be reviewed after the first two years of the program.

APPENDIX

SIMILAR PROGRAMS

Mankato State College

Bachelor of Science Non-Major Degree

This degree is conferred upon completion of 192 quarter hours of A,B,C, or P, at least half of which must be in 3000-4000 courses. Upon completion of 45 hours of 1000-2000 courses with a 2.0 grade point average, the student may request permission to register for upper-level courses. This may be obtained at the office of the Dean of Arts and Sciences.

There are no specific course requirements in this program, nor must prerequisites be met. The student may take whatever interests him. Consequently, the program is designed for laying the basis for an education rather than for preparation for professional or other occupations. If a student in this program transfers to a major-minor program, he must meet all general education and grade point average requirements for that program.

There is a consultant for the non-major program, whose name may be obtained at the office of the Dean of Arts and Sciences.

University of Minnesota

Bachelor of Elected Studies

The B.E.S. program, designed to give individual students maximum latitude in planning degree patterns, was introduced experimentally in 1972. CLA students may enter it at designated enrollment periods, after they have earned 12 credits and before they earn 106. Selection is by lot.

The B.E.S. degree program gives students wide flexibility in selection of course work. Subject only to the quantity and quality requirements... each individual degree candidate designs his program to suit his own needs and to provide the components of a liberal education...in the way he thinks most appropriate for him.

Requirements include: completion of 180 credits, 45 in residence, 30 in the senior year; 75 total credits in upper division; same honor point requirements as for other University degree programs in CLA; no major required; and no requirements in English composition, foreign language, or group distributions.

APPENDIX J

ASSOCIATE OF ELECTIVE STUDIES

PROPOSAL FOR AMENDING THE APPROVED BACHELOR OF ELECTIVE STUDIES DEGREE PROGRAM TO INCLUDE THE AWARDING OF AN ASSOCIATE OF ELECTIVE STUDIES DEGREE

I. STATEMENT OF REQUEST

In the belief that many potential post-high school, non-traditional students will be more likely to avail themselves of the services and offerings of St. Cloud State College if they can sample the offerings (initially, at least) in accordance with their own interests and abilities rather than in the patterns of traditional two and four-year programs, approval is requested for amending the approved Bachelor of Elective Studies (BES) Degree Program to include the awarding of an Associate of Elective Studies (AES) Degree to students who desire such a degree after the completion of 96 quarter credits in courses of their own choosing.

II. PHILOSOPHY BEHIND THIS REQUEST

Although the Associate in Arts and the Associate in Science Degree Programs as presently structured by St. Cloud State College offer considerable flexibility in student choice, the curricula are planned in accordance with faculty desires for the education of traditional students working toward definite educational goals rather than to attract the interest of students still seeking to determine their own educational objectives, or of the older members of the community who may never have engaged in post-high school educational activities or who may have had significant gaps in their higher educational careers.

It is believed that the educational doors of St. Cloud State College should be opened wider to make its staff and facilities accessible to the broadest possible spectrum of Minnesotans. This would encourage maximum matriculation and continued participation in the educational programs and use of the services of the College by the greatest possible number of citizens in the community who can profit from such activities.

Although it might be best if every individual were aware of his/her ultimate career goal in early childhood, many students enter institutions of higher education uncertain of their abilities and undecided as to their academic and personal interests. It is believed that such students should be offered maximum flexibility in testing, tasting, and exploring new subjects and unfamiliar fields in establishing their educational goals. It is also believed that students who have had significant gaps in their educational careers are sometimes ill at ease, discouraged, and frequently at a great disadvantage when enrolled in required courses or programs designed for the interests and abilities of traditional students. The availability of the AES degree would provide an attractive alternative to such non-traditional students.

III. REQUIRED MODIFICATION IN GENERAL BULLETIN MATERIAL

In the interest of clarity, the General Bulletin description of the currently approved BES Degree Program and a draft of a General Bulletin description of the proposed AES Degree Program are provided below:

A. General Bulletin Description of the Approved BES Degree Program

The Bachelor of Elective Studies (BES) degree provides students with an opportunity to develop and design their own programs of study. It allows students considerable latitude in planning degree programs to meet their educational and vocational goals.

1. Requirements for the BES degree:
   a. Completion of 192 credits with a 2.00 (C) average.
   b. Earn at least 48 credits in upper division (300-400) courses.
   c. No more than 96 credits can be earned in any one discipline.
   d. No major or minor program is required; however, students may complete majors or minors in those departments which indicate BES programs are available. (See individual departmental listings.)
   e. Meet the residence requirement of St. Cloud State College as outlined in the College Bulletin.

2. Who Is Eligible:
   Students who meet the admission requirements for St. Cloud State College and students enrolled either previously or currently who have a 2.00 (C) average are eligible to apply for admission to the Bachelor of Elective Studies degree. Applications are accepted the first three weeks of each quarter. Application forms are available during this period in the Office of Academic Affairs, Administrative Services Building.

B. Proposed General Bulletin Description of the AES Degree Program:

The Associate of Elective Studies (AES) degree provides students an opportunity to develop and design their own two-year programs of study. The degree may be earned by the completion of 96 quarter credit hours of self-selected courses. Faculty advisers will assist such students in planning programs of study that will achieve their individual educational goals.

1. Requirements for the AES degree:
   a. Completion of any 96 credits with a 2.00 (C) average.
   b. Meet the residence requirement of St. Cloud State College as outlined in the College Bulletin.
   c. No more than 48 credits in any one discipline will be applicable toward the AES degree.

2. Who Is Eligible:
   Students who meet the admission requirements of St. Cloud State College, or who, if currently or previously enrolled, have a 2.00 (C) average are eligible to apply for admission to the Associate of Elective Studies degree program. Application forms are available in the Office of Academic Affairs, Administrative Services Building.

IV. OBJECTIVES OF THE ASSOCIATE OF ELECTIVE STUDIES DEGREE PROGRAM

A. To enable students to test their personal as well as educational goals by ranging broadly among what they believe to be relevant courses in areas or fields of study of interest to them.

B. To reach out into the community to serve people who hope that higher education may help them to cope with conditions and deficiencies which hinder their progress in life.

C. To enable students to enroll in a wide variety of self-selected courses that will enrich their individual lives, help to prepare them to function more effectively as citizens of their respective communities, and to develop their understanding of the world beyond their horizons.

D. To provide students embarking on a two-year program of studies with an opportunity to develop a more positive attitude toward learning, self-motivation, and the acquisition of the basic learning skills necessary for success in college by giving them maximum latitude in the selection and sequential planning of courses best suited to their individual interests and abilities.

E. To accelerate the academic progress of some candidates for an Associate degree whose enrollments are dependent upon the availability of evening courses suitable to their interests and abilities.

F. To offer a tangible reward in the field of general and liberal arts education to those students who at the beginning of their studies do not intend to pursue formal education beyond the community college level, as well as to those who may wish to secure a certification of the completion of two years of college study to enhance their prospects for employment or promotion.

V. EXPERIMENTAL FEATURES

The experimental features of the AES degree program have been tested in the Self-Selection Program of St. Cloud State College that resulted in the recent approval of the BES degree program here.

VI. INSTITUTIONS OF HIGHER EDUCATION HAVING SIMILAR PROGRAMS

During the last five years there has been a very considerable nationwide increase in the number of institutions of higher education adding student self-selection programs to their individual academic programs as is indicated in the following paragraph from an April 4, 1975, communication addressed to Dr. Donald Sikkink by Dr. Don M. Flourny, Dean of the University College, Ohio University, Athens, Ohio:

> As you undoubtedly know, the movement to individualize and allow for student-structuring of degree programs is spreading. The Ohio Board of Regents has just approved a new Associate of Individualized Studies Degree option to complement four-year Bachelor of General Studies, Bachelor of Liberal Studies, Bachelor of Special Studies, and Special Major Degrees. There must be almost 100 of these four-year degrees now on the books--most since 1970-71--and the two-year approach also seems to be catching on.

That the two-year approach is catching on is demonstrated by information provided in the bulletins of several Minnesota colleges.

Normandale Community College offers an Associate in Elective Studies degree permitting the free self-selection of courses by students.

Anoka-Ramsey Community College, Brainerd Community College, and Mesabi Community College offer Associate in General Studies degrees permitting similar free selection of courses by students.

Fergus Falls Community College offers an Associate in Selected Studies degree permitting the same free selection of courses by students.

The General College of the University of Minnesota permits free selection of courses by students seeking the Associate in Arts degree; however, it does require such students to pass a General College Comprehensive Test to complete requirements for this degree.

Lakewood Community College offers an Associate in Elective Studies degree; however, it requires three credits in each of the following areas: English, Humanities, Social Science, Mathematics/Science, and Physical Education/Health.

Except for St. Cloud State College, which requires Speech Communication 161 (4 credits) and English 162 (4 credits), the other state and community institutions of higher education in Minnesota also limit the choice of students seeking Associate degrees by requiring varying amounts of credits (23-66) in general education courses freely selected from lists of specific courses in several areas.

VII. ANTICIPATED STUDENT DEMAND

Although in the past many students completing pre-professional programs, as well as some students in the current BES Program, have qualified for the award of a two-year degree without petitioning for the award of an Associate degree, it is believed that in the future the following factors will stimulate participation of students in the proposed AES degree program in the numbers projected below:

1. Many students who are already disenchanted by the academic requirements of their current programs and are contemplating dropping out of college will be encouraged to enroll in additional courses to obtain formal evidence of academic achievement.

2. Many part-time students engaged in programs of study in which they are frustrated by the unavailability of desired evening courses at times suited to their interests and abilities, as well as work and social schedules, will be able to accelerate their academic progress.

3. Many part-time students in the BES Program who have not yet completed a material amount of the work required for the degree may choose to request the award of the AES degree as evidence of academic progress.

4. Many members of the St. Cloud community whose formal education ended several years ago will be encouraged to resume their education because of the flexibility of the proposed program.

5. Since there are no community colleges in the primary commuting area of St. Cloud State College, and since there are substantial enrollments in the general education programs of the eighteen community colleges in Minnesota, it would appear that there must be a considerable potential of unmet demand in the greater St. Cloud area.

These were the factors considered in arriving at the following estimated projections:

Number of Students Anticipated in the Program	First Year Per Qtr.	First Year Per SS	Fifth Year Per Qtr.	Fifth Year Per SS
Full Time (16 Credits)	25	5	100	20
Part Time (4 Credits)	100	30	500	100
Translated into FTE's:	53.3	10.7	240	37

VIII. COST OF THE AES DEGREE PROGRAM

Although it is expected that the availability of the AES degree program will stimulate the enrollments of non-traditional students during a period when the enrollments of traditional students are expected to level off at a figure slightly higher than the enrollment figure for 1975, it is believed that the additional enrollments will in themselves require no additional faculty, activities, or facilities of any kind.

The only cost to the College would be the expense of AES degree diplomas, and, of course, absorption of some additional recordkeeping and reporting.

IX. EFFECT OF THE PROGRAM ON THE COLLEGE

The availability of the AES degree would increase enrollments in many departments of the College and thus put our facilities and faculties to greater use to the community.

The College would gain additional support and credit as an institution offering greater educational opportunities in its commuting area. A clearly labelled non-traditional degree would distinguish between students pursuing conventional Associate in Arts and Associate in Science programs and those selecting to secure a degree in elective studies.

As an indication of the potential increased enrollments that might result from the establishment of the AES degree program, it should be noted that the 1973-75 Bulletin of the General College of the University of Minnesota, which operates in an area hosting several public and private colleges, indicates that steps have been taken to limit the access of students to the Associate in Arts degree by the initiation of a lottery system to limit the enrollment of students freely electing their own courses of study.

X. PLAN FOR EVALUATING THE RESULTS OF THE PROGRAM

If approved, the results of the amending of the BES degree program to include the award of the AES degree will be evaluated for the next four years on the following points:

1. What are the characteristics of the students who elect to participate in the AES degree program?
2. How many of the currently required general education courses do the AES degree students complete?
3. What is the academic record of the AES degree students?
4. What is the drop-out record of the AES degree students?
5. What is the rate of progress of the AES degree students?
6. What is the level of courses selected by AES degree students?
7. What courses do the AES degree students select?

8. What is the rate of completion of courses selected by AES degree students?

9. What is the employment potential or achievement of students who have completed the AES degree program?

These items will be evaluated by the individual assigned to direct the program, and the results will be forwarded to the Curriculum Council and the Vice President for Academic Affairs.

April, 1975

ST. CLOUD STATE COLLEGE
ST. CLOUD, MINNESOTA 56301

SELF-SELECTION PROGRAM

OPEN HEARINGS ON THE

ASSOCIATE OF ELECTIVE STUDIES DEGREE PROPOSAL

Based on the January, 1972, Curriculum Council's procedure established for college-wide curriculum proposals, open hearings on the Associate of Elective Studies Degree proposal were held in the Mississippi Room, Atwood Center, on Tuesday, April 29, 1975, from 9:00 - 10:00 a.m. and on Wednesday, April 30, 1975, from 11:00 a.m. - 12:00 noon. Comments from people attending these hearings are summarized as follows:

1. Lyle VanPelt, English Department
   a. Questioned whether the student who completes this program and then decides to pursue a regular four-year program needs to complete the general education requirements.
   b. Questioned the initiation of a second "elective studies" program when complete data about the "saleability" of the four-year elective studies program was not available.
   c. Indicated a need for advising students in this program so that they are given accurate information on what the program offers.
   d. Council should consider an enrollment limitation.
   e. Include in the proposal a more explicit statement on the requirements if the student chooses to continue at St. Cloud State in a four-year program.

2. Robert Prochnow, Psychology Department
   a. Supports the proposal.
   b. Indicated the need of some people for whom having a degree is important, but not specific requirements. This proposal would open the door for these individuals.
   c. Individuals pursuing this type of degree program may be influenced to continue in longer-term programs.

3. Lowell R. Gillett, Dean, Graduate Studies
   a. Degree proposal would be attractive to individuals who have interests in academic study, but not necessarily specific career goals.
   b. Emphasized the importance of "good" advising.

4. Alan Downes, Director, External Studies
   a. Degree proposal would be of great value in the External Studies Program.
   b. Proposal would offer an opportunity for a more immediate goal.

5. Warren Armstrong, Dean, School of Liberal Arts and Sciences
   a. Does not actively oppose the proposal.
   b. However, does have a personal and philosophical objection to the concept of elective studies.
   c. Indicated student needs and interests are not identical.

6. Howard Russell, Academic Affairs
   a. Degree proposal could be useful to persons seeking courses focused on specific career goals.
   b. Enrollment figures from community colleges in the state suggest that there is a need for this type of degree in a community the size of St. Cloud.

Wednesday, April 30, 1975

1. nez Kronenberg, Professional Support Personnel
   a. Proposal would make a two-year degree more accessible for continuing education students.
   b. Adapted to evening and part-time students.

2. Robert Bayne, Counseling and Related Services
   a. Supports the proposal.
   b. Degree proposal facilitates the purposes of the institution as outlined in the Bulletin.
   c. AES would provide a social change vehicle (for further information refer to the Student Personnel Series No. 15, New Directions in Community College Student Personnel Programs, p. 9.

3. David Sprague, Vice President, Student Life & Development
   a. Supports the proposal.
   b. College responsible to community for educational opportunities.
   c. Proposal makes students assume responsibility--freedom to choose and responsible for the outcomes.
   d. Need for SCS to assume some community college activity.

4. Patricia Potter, Associate Dean of Students
   a. Proposal would meet the needs of community people, particularly women.
   b. AES degree would provide a means of measuring quantity and achievement.
   c. Degree achievement has influence on business and industry.

5. Charles Rehwaldt, Biology
   a. Sees the degree proposal as a measure for preprofessional students.

6. William Nunn, Interdisciplinary Studies
    a. Raised the question as to whether students completing the AES would continue with the BES.
    b. Indicated the need for adequate counseling, especially for those who continue with a four-year degree program.
    c. Proposal offers a good degree of flexibility and interchangeability.

7. Mil Voelker, English
    a. Supports the concept of the proposal.

8. Robert Earles, Mathematics
    a. Questioned a possible need for an enrollment limitation.
    b. Proposal has implications toward a junior college concept.
    c. Possible effects on general education program.
    d. Possible need for compensatory courses.

9. Kent Carlson, Mathematics
    a. Raised the question of a clientele that wants this type of program.
    b. Sees proposal as an aim for the "good of the student."
    c. May lead to an "erosion" of the liberal arts.

10. Hugh Barker, Biology
    a. Supports the program.
    b. Urges any student terminating, transferring or stopping out after the sophomore year to take the Associate degree.

APPENDIX K

AN ANALYSIS OF DIFFUSION
OF THE
BACHELOR OF ELECTIVE STUDIES
AT
ST. CLOUD STATE UNIVERSITY

INTRODUCTION

"State colleges" originally served a fraction of the total enrollment in higher education but presently enroll approximately one-third of that population. These present multi-purpose colleges developed in most cases out of a single purpose normal school and teacher college role. Historically, the teacher's college pattern was marked by close board control, autocratic internal administration, inadequate financing, and prescribed curriculums.

State colleges today face a sizeable task in adapting to the role of becoming multi-purpose institutions. This task is particularly difficult in curriculum for some of the old "teacher's college" patterns have remained and new requirements have frequently only reflected attempts to imitate liberal arts colleges or universities. A major deterrent to curricular innovation has been lack of financing since the funds available to many state colleges are frequently insufficient for existing programs. For this and other reasons, curriculum experimentation in state colleges has been limited.

Recent student and faculty dissatisfaction with higher education, however, has resulted in a "cognitive revolution;" that is, "cognitive expansion has thrown up a reaction which denies the value of rationally, systematically, empirically gained knowledge," and supports the belief in spontaneity and expressiveness.[1] The issue in this dissatisfaction has been the question of the relevance of education. The problem with relevance as an issue is that students and faculty do not agree among themselves as to what is relevant. Despite this, we should expect students to continue to question their education; and their major questions will be directed toward curriculum and instruction. The major thrust of this criticism could hinge on the issues of relevance of courses/requirements and quality of instruction. Talcott Parsons in examining this concept notes that change has been advocated in two directions: (1) a search for "relevance," basically concern for political reform; and (2) development of self expression and a "freer" pattern of life.[1]

---

[1] Edward Shils, "Sources of Change in the Character and Functions of Universities," Universities Quarterly, XXVIII (Summer, 1974), p. 314.

We thus face the prospect of future curriculum protests in a college system that traditionally has not been responsive to curriculum innovation. The following study of curriculum innovation examines this problem.

ISSUE DEFINITION

St. Cloud State University has had a rigid Bachelor of Arts degree structure with specific general education requirements and major/minor programs. Opportunities to provide educational options to meet students' individual needs and their demands for relevance in education have been lacking.

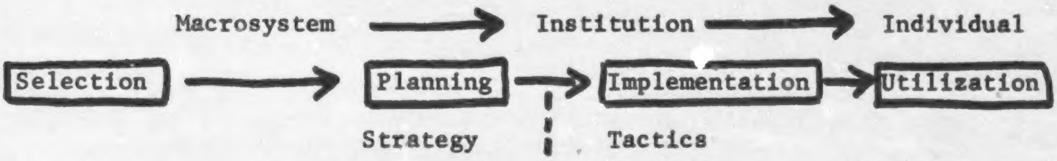
Preferences of faculty members at this institution with reference to curricular patterns have generally included: (1) maintaining traditional or status quo programs because of the fear of innovative impact on staffing alignments and budgetary allocations; and (2) assumption that curricular programs should be pre-designed with a minimum amount of flexibility or choice allowed the student. Changing students and changing societal needs, however, have forced faculty to re-examine these preferences, suppress cautious resistance, and explore the possibilities of curricular change.

---

[1] Talcott Parsons, "Stability and Change in the American University," Daedalus, CIII (Fall, 1974), pp. 270-271.

It is the purpose of this paper, therefore, to examine the process in a state college institution--St. Cloud State University--from the time a curricular innovation is initiated to its acceptance by the institution. A four-stage model of a diffusion process will be utilized in this examination process: (1) a selection stage; (2) a planning stage; (3) an implementation stage; and (4) a utilization stage. Within the selection stage, the problem is to choose an innovation that will work. This usually involves someone (or group) who has been introduced to an idea which he/she feels could be of value. The planning stage then involves the development of this conceptual idea into a workable proposal and may involve a trial period or experimental program. The third stage, implementation, relates to efforts by the innovator(s) to persuade others to adopt the innovation; and the fourth, utilization, measures the degree to which the innovation is adopted.

Four-Stage Model of the Transfer Process[1]



Although these stages may overlap somewhat, it will be attempted to retain this conceptual framework in the development of this paper.

In addition to the above framework, the following terms and definitions will be used in the analysis:

---

[1] Paul Hurst, "Three Criteria for the Selection Stage of the Transfer of Educational Innovations," Comparative Education, XI (March, 1975), p. 64.

Innovation: "an idea perceived as new by the individual."[1] Thus, the focus on change accepted here is that which is new to the implementing institution (St. Cloud State University).

Diffusion: "the process by which an innovation spreads in a social system."[2] In this instance, St. Cloud State University is the population of the social system.

Strategy: "means for causing an advocated innovation to become successfully installed in an on-going educational system."[3]

Tactics: methods used in the application of these strategies in the implementation of change.

With the model developed and these definitions, the four stages of the the transfer process in curriculum change at St. Cloud State University will now be examined.

SELECTION STAGE

Although an awareness for the need for curricular change and flexibility in degree programs existed for some time at St. Cloud State University, it was not until 1970 when the Minnesota State University Board established a fund for innovative purposes that a proposal was developed. At that time, Dr. Donald E. Sikkink, then Dean of the School of Arts and Sciences, developed a proposal for an experimental program entitled "A Project in the Self-Selection of Courses and the Self-Determination of Rate of Progress.' The proposal stated that the students would be granted

Bachelor of Arts degrees upon meeting the following requirement:

> The completion of any self-selected 192 undergraduate quarter credits with an over-all grade point average of 2.00 (C). At the time of graduation, the students' transcripts will be marked to indicate that they have earned Bachelor of Arts degrees under a pilot program in self-selection. No major is required for graduation, but a student completing any 48 credits in any discipline will be granted a major in that field.

Though this was not proposed as a permanent program, it was hoped that the results would help determine if such a program should exist on a permanent basis.

The project was based on several assumptions. They included:

1. "Good teachers" are of greater importance to the real education of a student than are specific courses, requirements, and credits.

2. Our environment is changing so rapidly today that the capacity of any group to correctly establish specific graduation requirements suitable for a large diverse student body is doubtful.

3. Self-motivation brought about when one makes his choices and then works to prove they were right can produce more learning than specific graduation requirements.

4. Many students are capable of a faster rate of progress in completing a degree than provided for by our present system.

To test these assumptions it was proposed that 200 students be admitted to the pilot program to work on the Bachelor of Arts degree on an experimental basis.

It should be noted that organizational position and role were highly influential in initiating and selecting this change. As Baldridge and Burnham indicated in their study, "those who had power, sanctions, communication linkages, and boundary roles appeared as to be important in the adoption of innovations."[1] Secondly, in assessing the selection of this innovation, it appears to meet the three criteria established by Hurst in the selection stage: (1) it is relevant to immediate and long-term requirements of the institution; (2) it is actually feasible in the changed environment--its minimum operational requirements can be satisfied; and (3) priority should be given the innovation, given available supplies of cash and trained or trainable manpower.[1]

PLANNING STAGE

The planning stage involved the development of this innovation into a workable proposal and given a trial period. To examine this stage and the curricular patterns within this institution, one must first study the established procedures adopted for implementing change within the State University system. Under the Minnesota State University Board Rules, Section 505(c) "each college constitution shall contain a description of the process for establishing...regulations on...the college curriculum and methods of instruction." Thus, under the St. Cloud State University Constitution, Section D(4), the faculty have a "major responsibility for the development, in consultation with students and appropriate administrative offices, of College Regulations relating to curriculum, the evaluation of instruction..." To comply with these regulations, a Curriculum Council was formed in 1968 with a membership consisting of the Vice President for Academic Affairs, the Assistant Vice President for Academic Affairs, the Director of Admissions and Records, ten faculty members, and four student members. The duties of the Curriculum Council give them the power to regulate and control curriculum patterns at St. Cloud State University.

---

[1] Hurst, "Three Criteria," p. 66.

As outlined in these powers, proposed changes in curriculum are referred first to various college and institute curriculum committees or the general education committee for action and then forwarded to the Curriculum Council. In compliance with "consultation with students and appropriate administrative officers," items approved by the Curriculum Council are then routed to the College Senate, the State University Board, the Curriculum Advisory Committee (CAC) of the Higher Education Coordinating Commission (HECC) and the final decision-making body--the HECC itself. Even though faculty have a "major responsibility" in curriculum decision making, it is evident that there are many agencies involved in this process of curricular change.

With this background on curriculum process, Dr. Sikkink presented his proposal to the Curriculum Council and to the General Education Curriculum Committee for their reactions before submitting it to the State University Board for funding under the special Innovative Funds Program. The Curriculum Council on March 9, 1970, discussed the program with Sikkink and "after his departure from the meeting, discussion continued," and a motion was passed that the Curriculum Council "cooperate with the philosophy of this type of experimental project." At its March 12, 1970, meeting the General Education Curriculum Committee "approved in principle the idea of the study on student self-direction."

Funding was granted by the State University Board, and the costs of the experiment were minimal--primarily funds to hire Barbara Grachek to assist in the project and compile research data and to release Sikkink one-third time to direct the program--a total of $16,000 over a two-year time period (1971-1973). Thus, at this point Sikkink was still the initial actor and change agent. The university's readiness to cooperate with him on the project was due in great part to their respect for his professional competence. Although he was challenging the "relevance of education" at this institution, it was apparent that his background in the arts and sciences and his philosophy toward a liberal arts education influenced their decisions. As a former speech professor, former president of the University Senate, and Dean of the School of Liberal Arts and Sciences, he was knowledgeable in the procedures to be used in formulating change and was recognized as a leader of positive change.

After the innovative program had been approved and funded, the Curriculum Council was again asked to act on the proposal and formalize the specific items that were approved in principle in 1970--a tactic to retain support mobilization of that group and to maintain open communication lines. At the April 11, 1972 meeting of the Curriculum Council a motion was made to accept the program. A lengthy discussion followed on the procedures for processing innovative proposals. A move by Council members representing the School of Business which was the major group opposed tc the experiment "to note that this body was not consulted prior to submission of this proposal and is being asked to approve a document which it had not seen before it was submitted to the Chancellor" was defeated and the original motion to approve the innovative program passed--seven Yes, two No. The School of Business at this time was in the process of developing curriculum and objectives for accreditation by the American Institute of Schools of Business. Their major programs consisted of 100-120 credits, and they were concerned that students in the experimental program would be declaring business majors of 48 credits. This motion was their method of informing faculty and students that this program infringed upon their sacrosanct and vested interests.

Once the project was established in early 1971 (the first students were admitted Fall, 1972), an Advisory Committee consisting of volunteer faculty interested in the experiment was established. Members of the Advisory Committee included: four administrators--Assistant Vice President of Academic Affairs; Dean of the School of Liberals Arts and Sciences; Director of Institutional Research; and the Director of Admissions and Records; four teaching faculty--areas of psychology (2); sociology, and geography; two students enrolled in the experimental program; Sikkink and Grachek. The Committee served only in an advisory capacity and did not have any final decision making power--that remained in Sikkink and Grachek's hands. The Committee's support and knowledge, however, proved to be strategic in generating interest for the experiment throughout the institution and on curriculum committees.

During 1972-1974 data was compiled on students enrolled in the experimental program. Some of the items measured included: (1) characteristics of the students; (2) number of general education courses completed; (3) number of required courses completed in a major; (4) grade point averages; (5) attrition rate; (6) rate of progress; (7) level of courses completed; (8) years needed to complete the degree; (9) course selectivity; (10) withdrawals and incompletes in courses; and (11) attitudinal studies. This data was then used in gathering support for a proposal for a permanent baccalaureate degree--the Bachelor of Elective Studies (BES) in the implementation stage.

IMPLEMENTATION STAGE

The implementation stage involved the efforts of the Advisory Committee, Sikkink, and Grachek to persuade others to adopt the innovation. Gross and others summarize this stage as follows: "Innovations introduced in schools are only proposals for change; to achieve their intended effect they must be implemented."[1] It was necessary, therefore, to influence members of this institution that the experimental program in self-selection had relative merit for permanent adoption.

The process of offering this alternative degree program--the Bachelor of Elective Studies--generated support and opposition from four areas: (1) federal government support; (2) student demand; (3) research data; and (4) faculty interests. Together these areas developed the necessary forces to consider a changing mission for the institution.

In early 1974, with funds from the State University Board near depletion, a proposal was submitted to the Department of Health, Education and Welfare's Fund for the Improvement of Postsecondary Education for continued support for the self-selection research project. A three-year grant for $50,000 was approved for 1974-1977. The federal government, therefore, entered the arena as an influential change agent in curriculum development at this institution by providing necessary resources for continued experimentation.

The second force involved students' demands for opportunities for flexibility and choice in their programs. Some students were dissatisfied with higher education, and an issue of this dissatisfaction was the relevance of education and in particular to relevance of course requirements.

---

[1] N. Gross and others, Implementing Organizational Innovations: A Sociological Analysis of Planned Educational Change (New York: Harper and Row International, 1971), pp. 6-7.

Because the experiment had been limited to 200 students, other students were now seeking an alternative degree pattern for themselves also.

The third influential factor involved the research data gathered. The majority of this data indicated that the students on the self-selection project compared to regular degree students were doing as well or better academically; had a more positive attitude toward their education; were selecting courses in a wide range of areas; were completing about one-third of the general education courses; and employment opportunities and graduate school admissions were available with no negative feedback from the participating students or schools. Although the data was somewhat limited--two years--it was more information gathered on any one group of students than ever before compiled at this institution. It was a case of our proving the need for change with the status quo not needing to prove its existence.

A fourth area for support mobilization involved faculty interests. This group proved to be the most diverse as the whole alternative change affected them on staffing and budgetary measures. Because the proposed BES degree did not require the completion of general education courses and the option of completing majors and minors, staffing patterns in many departments could be jeopardized. The State University system is funded on a student-teacher ratio, and most departments depend heavily on general education enrollment to subsidize their staffing needs. Thus, to alter this area in their departments could create problems. From the budgetary standpoint, the BES would not cost additional monies as students would be choosing classes from existing class offerings. The monetary problems would arise, however, if staffing patterns changed. It was necessary here to demonstrate to the faculty the relative advantages of this type of program, the compatibility of it to other degree programs, and the rate of adoption of similar programs in other institutions.

With these four forces in mind, the Advisory Committee assisted Sikkink and Grachek in developing a proposal to be submitted through the proper curriculum channels for a permanent baccalaureate degree--the Bachelor of Elective Studies. Two members of the Advisory Committee served on the Curriculum Council; two served on the General Education Curriculum Committee; and the two student members were active in student affairs and publications. Thus, the Advisory Committee as a whole was of great assistance in modifying and finalizing the proposal to meet the criteria of these agencies.

The BES proposal as submitted to the curriculum agencies was modified to some extent as a result of the experimental program. Individual departments were given the right to participate or not participate in the major/minor programs to some extent if they so desired. A limitation on the number of credits earned in any one discipline and the upper division requirement were also modifications. These changes from the original experiment removed the basic factors which acted as critical constraints to faculty in the change process.

The first committee to examine the permanent proposal was the General Education Curriculum Committee (GECC). Sikkink and Grachek attended that meeting of March 26, 1974, to answer questions they had concerning possible effects on staffing patterns for departments dependent on general education enrollment. Members of the GECC agreed with the philosophy of the proposal throughout the discussion and presentation of data. In a unanimous decision, the GECC approved the proposal with a recommendation that the enrollment in the degree program be limited to ten per cent of the total on-campus enrollment. As our enrollment projections came no way near that figure (expected 100-200 students a year), we were willing to write this restriction into the proposal.

The proposal was placed next on the agenda of the Curriculum Council's March 28, 1974, meeting. Sikkink and Grachek were again asked to be present to answer questions of the Council. Council members moved and seconded the approval of the proposal. After much discussion on the ramifications of such a degree program on other offerings of the institution, a student member, concerned with possible rejection of the motion, moved to "postpone this proposal definitely to the next meeting." It died for a lack of a second. Discussion continued after Sikkink and Grachek left the Council meeting, and a motion to amend the proposal with an enrollment limitation of 700 students in the first two years with a maximum of 200 new freshmen was passed and the main motion as amended carried unanimously.

The next decision-making group involved the University Senate which is the final authoritative body of the university (excluding the President) and is composed of faculty, students, and professional support personnel. The procedure of adopting curriculum minutes by this group is usually a formality; however, the BES proposal forwarded by the Curriculum Council was again the subject of debate. A faculty senate member and an opponent to the proposal (because of his department's dependency on generated general education FTE's) cited previous action of the Curriculum Council regarding the Self-Selection Program and raised questions regarding the procedures used in processing this proposal and the impact of this program on the university. He moved to "refer this issue back to the Curriculum

Council with instruction to at least determine the reaction of major agencies of the college and for more complete consultation with the various agencies of the college." A move to postpone the issue definitely to the next meeting was then employed. A third motion to amend to include "to invite several members of the Curriculum Council to the next College Senate meeting" was added. As Sikkink and Grachek were observing the meeting, a member of the Senate who supported the concept asked that we be permitted to speak and answer questions raised by the Senate; and the request was approved. After discussion on effects on staffing allocations and the costs of instituting such a program, the move to postpone the issue definitely to the next meeting and the move to refer were both defeated by voice votes. No further action was taken on the Curriculum Council minutes; and therefore, "these minutes stand approved as distributed."

Having the necessary approval from within the institution, the proposal was forwarded to the state governing agencies--the State University Board and the Higher Education Coordinating Commission--for final action. It was approved by all of these agencies and was implemented as a permanent degree program for the institution on July 29, 1974. Thus, methods of advocacy and communication, competence, and support, confidence and trust in relationships used by the change agents and the resources generated by government support were effective in implementing a change in policy, precedent, and custom within the curriculum at St. Cloud State University.

UTILIZATION STAGE

Within this fourth stage of the original framework, the degree to which this curricular change has been adopted in the past year will be examined. During 1974-75 approximately 125 students were admitted to the BES degree program, and 28 have graduated. This degree program serves the needs of three groups of students: (1) those students who have definite educational/vocational/professional goals in mind and utilize this opportunity to develop and design their own programs of study to meet their particular needs; (2) those students without specific educational/vocational/professional goals who see college as a place for personal development; and (3) those students who have pursued certain programs, such as teacher education, and discover that they are not satisfied with that selection, and as a result have an "awkward" or "broken" program not well suited to meet the B.A. degree requirements but which can be used in the BES program for a college degree.

Although the BES degree does not require the student to select a major or minor field of study, majors and minors are available in most disciplines in the Colleges of Fine Arts, Industry, Liberal Arts and Sciences, and some in Education under one of two plans. Some disciplines allow the students to complete a major with any 48 credits or a minor with any 36 credits of their own choosing in that discipline. Included in this plan are Anthropology, Biology (200-level courses and higher), Earth Science, Geography, Philosophy, Physics (200-level courses and higher), Psychology, Sociology, and Speech. Other disciplines indicate that 48-credit majors and 36-credit minors are available through a negotiated agreement between the student and the discipline. Included in this group are Art, Chemistry, Criminal Justice Studies, Economics, English, Foreign Languages, History, Industrial Arts (non-teaching), Library/Audio Visual (minor), Mass Communications, Mathematics, Music, Political Science, Recreation, Social Science, Social Work, Speech Pathology, Technology, Theatre, Urban Affairs, and Women's Studies (minor). One specific area not participating in the major/minor options is the College of Business, opposition in the original experiment, because of the 48- and 36-credit limitations for majors and minors. Thus, it can be seen in this utilization stage that many of the disciplines are adopting this change and servicing students in their areas with it.

Further utilization was effected in 1975 when the BES degree was amended to provide the additional option of a two-year degree--the Associate of Elective Studies (AES). Under the terms of this degree, students will be awarded the AES upon completion of 96 credits of their own choosing with a 2.00 (C) average. In addition to providing students a method of certification for two years of college work, the AES also serves as a short-term goal for the prospective BES student.

Thus, through direction, coordinated research, communication and dissemination of findings on the experimental program, and support mobilization of individual members of the social system and its resources, it has been possible to implement change and carry it through to its utilization stage.

FINAL COMMENTS

In developing this diffusion process for curricular change at St. Cloud State University one should note the importance of "faculty power," the need for support mobilization, and the use of other resources. These areas are crucial in the incorporation of a change process.

Faculty have the major responsibility for curriculum development at this institution, and most curricular changes are presented by them. Students are members of the Curriculum Council and other curriculum committees, but they do not have the power under their constitution to implement curriculum proposals. Thus, their only recourse is to influence faculty members to introduce changes for them. Faculty, therefore, are instrumental in the change process.

As is the norm then, the initial actor in curricular innovation with a new baccalaureate alternative at St. Cloud State University was a faculty member. His "power" was additionally reinforced by his influential status among his peers. He had experience in both teaching and administration, had served as a member of various governing agencies within the institution, and had been active in faculty association roles. His credibility was definitely an asset in his role as change agent.

The support mobilization phase involved generation of interest among those faculty members who supported or were neutral to the idea of the proposed degree program and an attempt to change the viewpoint of those who supported the traditional status quo patterns. This support mobilization was concentrated on faculty members because of their dominant role, and the limited student interest in this curriculum development was already supportive of the change.

Presentation of supportive data from the experimental program also proved to be a valuable resource. As limited research has been completed on the value of the traditional status quo programs, this data was instrumental in convincing faculty of the need for the alternative choice. Financial support for the project by the federal government was also an instrumental resource in influencing change.

Alternative educational opportunities were approved, therefore, over the concerns of faculty with staffing and budgetary controls. The realization of the need for student choice and flexibility, the value of this type of educational opportunity, and the "relevance" of the educational process survived.
